

Blockchain Tech Lead

Blockchain Architecture, Web3 Platforms & Engineering Leadership

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, digital infrastructure, AI, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the development of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio includes companies building blockchain infrastructure, decentralized finance (DeFi) protocols, Web3 applications, and digital asset solutions that are redefining the future of finance and the internet.

We are seeking an experienced **Blockchain Tech Lead** to lead the design, development, and delivery of secure, scalable blockchain platforms while mentoring engineering teams and driving technical strategy across Web3 initiatives.

The Opportunity

As a Blockchain Tech Lead, you will combine deep blockchain expertise with technical leadership to architect decentralized systems, guide engineering teams, and ensure the successful delivery of mission-critical blockchain products.

Working closely with Product Managers, Engineering Managers, Security Engineers, and Executive Leadership, you'll define technical direction, establish engineering standards, and build innovative blockchain solutions supporting DeFi, DAOs, tokenization, digital identity, and enterprise Web3 applications.

This role is ideal for an experienced blockchain engineer who enjoys solving complex distributed systems challenges while mentoring engineers and influencing long-term technology strategy.

What You'll Do

Technical Leadership

- Lead the architecture, design, and implementation of blockchain-based platforms and distributed systems
- Define technical standards, coding practices, and blockchain development guidelines
- Mentor blockchain engineers through architecture reviews, code reviews, and technical coaching
- Drive engineering excellence across Web3 initiatives and blockchain infrastructure
- Evaluate emerging blockchain technologies and recommend strategic adoption

Blockchain Engineering

- Design and develop decentralized applications (dApps), backend services, and blockchain infrastructure
- Build secure integrations with smart contracts, wallets, and decentralized protocols
- Develop services supporting digital assets, tokenization, staking, governance, and blockchain analytics
- Lead blockchain performance optimization, scalability improvements, and network integrations
- Ensure blockchain applications meet enterprise-grade security and reliability standards

Architecture & Platform Development

- Design scalable distributed architectures supporting high-volume blockchain applications

- Guide smart contract architecture and integration strategies
- Improve blockchain indexing, event processing, and transaction monitoring systems
- Support cloud-native deployment and infrastructure automation
- Drive technical roadmaps for blockchain platform evolution

Collaboration & Delivery

- Partner with Product Managers to translate business requirements into scalable technical solutions
 - Collaborate with DevOps, Security, QA, and Infrastructure teams throughout the development lifecycle
 - Lead sprint planning, technical estimation, and architectural discussions
 - Identify technical risks and implement mitigation strategies
 - Promote collaboration, innovation, and continuous improvement across engineering teams
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- 3+ years of hands-on blockchain or Web3 development experience
- 2+ years of experience leading engineering projects or mentoring software engineers
- Proven experience delivering production-grade blockchain applications and distributed systems
- Experience working in Agile software development environments

Technical Expertise

Strong experience with:

- Solidity
- Rust, Go, TypeScript, or Node.js
- Ethereum and EVM-compatible blockchains
- Smart contract architecture and development
- Web3 libraries (ethers.js, viem, or web3.js)
- REST APIs and GraphQL
- Docker and Kubernetes
- Git-based development workflows

Strong understanding of:

- Blockchain consensus mechanisms
 - Distributed systems architecture
 - Layer 2 scaling solutions
 - Wallet authentication and transaction management
 - DeFi protocols and token standards
 - DAO governance frameworks
 - Cryptography fundamentals
 - Cloud-native infrastructure and DevSecOps practices
-

Preferred Qualifications

- Experience building DeFi platforms, decentralized exchanges (DEXs), staking protocols, or tokenized asset platforms
 - Experience with Layer 2 ecosystems including Arbitrum, Optimism, Base, Polygon, Avalanche, or zkSync
 - Familiarity with blockchain infrastructure providers such as Alchemy, Infura, QuickNode, Chainlink, or The Graph
 - Experience using Hardhat, Foundry, Tenderly, or OpenZeppelin development frameworks
 - Experience with AWS, Terraform, Kubernetes, and CI/CD automation
 - Active contributions to open-source blockchain projects or participation in the Web3 developer community
-

Technology Environment

Blockchain Technologies

Ethereum • Solidity • Rust • Go • EVM • Smart Contracts • Web3

Web3 Development

Ethers.js • viem • Web3.js • Hardhat • Foundry • OpenZeppelin

Backend & APIs

Node.js • NestJS • GraphQL • REST APIs

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Data & Messaging

PostgreSQL • Redis • MongoDB • Kafka

Monitoring & Security

Prometheus • Grafana • OpenTelemetry • Datadog

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead the development of cutting-edge blockchain and Web3 platforms
 - ✦ Exposure to innovative DeFi, DAO, tokenization, and digital asset initiatives
 - ✦ Collaborative, engineering-first culture focused on ownership and technical excellence
 - ✦ Career advancement into Blockchain Architect, Engineering Manager, or Principal Engineer
 - ✦ Strong investment in continuous learning, open-source contribution, and emerging blockchain technologies
-

Apply

If you are passionate about blockchain engineering, technical leadership, and building secure, scalable decentralized platforms that shape the future of Web3, we'd love to connect with you.
