

Lead Backend Engineer

Backend Architecture, Cloud Services & Scalable Platform Development

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, AI, blockchain, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of technology-driven businesses by providing strategic guidance and operational support. Our portfolio companies build secure, scalable platforms that power financial services, enterprise software, cloud-native applications, and next-generation digital products.

We are seeking an experienced **Lead Backend Engineer** to lead the design, development, and evolution of scalable backend systems that support high-performance applications and business-critical services.

The Opportunity

As a Lead Backend Engineer, you will provide technical leadership while remaining hands-on in the design and development of modern backend platforms. You'll collaborate with Product Managers, Frontend Engineers, DevOps, QA, and Engineering Leadership to architect reliable systems, mentor engineers, and deliver high-quality software at scale.

This role combines software architecture, technical mentorship, and engineering leadership, offering the opportunity to shape platform strategy while solving complex technical challenges.

What You'll Do

Backend Engineering

- Design, develop, and maintain scalable backend services, APIs, and distributed systems
- Build secure, high-performance applications using modern backend frameworks and cloud technologies
- Design RESTful APIs, GraphQL services, and event-driven architectures
- Optimize application performance, scalability, reliability, and security
- Write clean, maintainable, and well-tested production code

Technical Leadership

- Lead backend architecture and technical design discussions
- Establish engineering standards, coding guidelines, and backend best practices
- Mentor software engineers through code reviews, technical coaching, and knowledge sharing
- Drive architectural improvements and long-term platform modernization
- Evaluate emerging technologies and recommend adoption where appropriate

Cloud & Platform Engineering

- Design cloud-native applications and microservices architectures
- Develop Infrastructure as Code (IaC) and automated deployment pipelines
- Improve observability through logging, monitoring, tracing, and alerting
- Ensure high availability, disaster recovery, and operational resilience
- Partner with DevOps teams to optimize infrastructure and deployment workflows

Cross-Functional Collaboration

- Work closely with Product Managers to translate business requirements into scalable technical solutions
 - Collaborate with Frontend Engineers, QA, and Infrastructure teams throughout the software development lifecycle
 - Participate in sprint planning, technical estimation, and roadmap planning
 - Identify technical risks and implement mitigation strategies
 - Foster a collaborative and engineering-first culture focused on continuous improvement
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional backend software engineering experience
- 2+ years of technical leadership or lead engineering experience
- Proven experience building scalable backend systems in production environments
- Experience working in Agile software development teams

Technical Expertise

Strong experience with:

- Java, Go, Python, Node.js, C#, or Kotlin
- RESTful APIs and GraphQL
- Microservices architecture
- SQL and NoSQL databases
- Redis
- Docker
- Kubernetes
- Git

Strong understanding of:

- Distributed systems architecture
- Event-driven systems and message queues
- API security and authentication (OAuth2, JWT)
- Cloud-native application development
- Performance optimization and scalability
- CI/CD pipelines and DevOps practices
- Secure software development principles
- System observability and monitoring

Preferred Qualifications

- Experience in fintech, SaaS, cloud platforms, or enterprise software development
 - Experience with AWS, Azure, or Google Cloud Platform
 - Familiarity with Kafka, RabbitMQ, Amazon SQS, or other messaging systems
 - Experience with Infrastructure as Code using Terraform or CloudFormation
 - Experience mentoring engineering teams and driving technical initiatives
 - Contributions to open-source projects or active participation in software engineering communities
-

Technology Environment

Backend Technologies

Java • Go • Python • Node.js • .NET • Kotlin • Spring Boot • NestJS

APIs & Architecture

REST • GraphQL • Microservices • Event-Driven Systems

Cloud & Infrastructure

AWS • Azure • Google Cloud Platform • Docker • Kubernetes • Terraform

Databases & Messaging

PostgreSQL • MySQL • MongoDB • Redis • Kafka • RabbitMQ

Observability & DevOps

Prometheus • Grafana • OpenTelemetry • GitHub Actions • Jenkins

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead the development of scalable backend platforms powering innovative businesses
 - ✦ Exposure to fintech, AI, blockchain, and emerging technology initiatives
 - ✦ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence
 - ✦ Career advancement into Staff Engineer, Software Architect, Engineering Manager, or Principal Engineer
 - ✦ Strong investment in leadership development, continuous learning, and professional growth
-

Apply

If you are passionate about backend engineering, scalable distributed systems, and leading teams that build secure, high-performance software platforms, we'd love to connect with you.
