About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, AI, blockchain, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of technology-driven businesses building world-class mobile applications, digital financial platforms, enterprise software, and next-generation consumer products. Our portfolio companies develop secure, scalable, and intuitive mobile experiences that serve users across global markets.

We are seeking an experienced **Lead iOS Engineer** to lead the design, architecture, and development of high-quality native iOS applications while mentoring engineering teams and driving mobile engineering excellence.

The Opportunity

As a Lead iOS Engineer, you will combine hands-on development with technical leadership to build modern, scalable iOS applications. You'll collaborate closely with Product Managers, UX/UI Designers, Backend Engineers, QA Engineers, DevOps teams, and Engineering Leadership to deliver exceptional mobile experiences while shaping the technical direction of our iOS platforms.

This role offers significant ownership over mobile architecture, engineering standards, and product delivery while providing opportunities to mentor engineers and influence the organization's long-term mobile strategy.

What You'll Do

iOS Development

- Design, develop, and maintain high-performance native iOS applications using Swift and SwiftUI
- Build reusable UI components, frameworks, and shared mobile libraries
- Develop secure integrations with backend APIs, authentication services, and third-party SDKs
- Optimize application performance, startup time, memory usage, and battery efficiency
- Write clean, maintainable, and thoroughly tested production code

Mobile Architecture

- Define scalable iOS architecture and engineering best practices
- Lead architecture discussions and technical design reviews
- Establish coding standards, design patterns, and development guidelines
- Improve application reliability, maintainability, and long-term scalability
- Evaluate emerging Apple technologies and recommend adoption strategies

Technical Leadership

- Mentor iOS Engineers through technical coaching, code reviews, and architecture guidance
- Lead complex technical initiatives across multiple mobile products
- Drive engineering excellence through automated testing and continuous integration
- Collaborate with Engineering Managers on technical planning and delivery
- Support hiring, onboarding, and career development for mobile engineers

Cross-Functional Collaboration

- Partner with Product Managers to translate business requirements into technical solutions
 - Collaborate with UX/UI Designers to deliver intuitive and accessible user experiences
 - Work closely with Backend Engineers to design scalable APIs and mobile integrations
 - Coordinate with QA and DevOps teams to improve testing, release automation, and deployment processes
 - Participate in sprint planning, roadmap discussions, and technical estimation
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- 5+ years of native iOS application development experience
- 2+ years of technical leadership or lead engineering experience
- Proven experience delivering large-scale production iOS applications
- Experience working within Agile software development environments

Technical Expertise

Strong experience with:

- Swift
- SwiftUI
- UIKit
- Combine
- Swift Concurrency (Async/Await)
- Xcode
- REST APIs and GraphQL
- Core Data or SwiftData
- Git

Strong understanding of:

- iOS application architecture (MVVM, Clean Architecture, VIPER)
- Mobile performance optimization
- Memory management and multithreading
- Offline-first mobile applications

- Secure mobile authentication and encryption
 - App Store deployment and release management
 - CI/CD pipelines and automated testing
 - Accessibility and Apple's Human Interface Guidelines
-

Preferred Qualifications

- Experience building fintech, healthcare, SaaS, blockchain, AI, or enterprise mobile applications
 - Familiarity with Firebase, AWS Amplify, or cloud-native mobile services
 - Experience implementing biometric authentication, Apple Pay, Push Notifications, Live Activities, Widgets, and Deep Linking
 - Experience with Fastlane, Bitrise, GitHub Actions, or Azure DevOps
 - Knowledge of XCTest, XCUITest, Snapshot Testing, and performance profiling tools
 - Contributions to open-source iOS projects, technical blogs, or conference presentations
-

Technology Environment

Mobile Development

Swift • SwiftUI • UIKit • Combine • Swift Concurrency • Core Data • SwiftData

Architecture & Design

MVVM • Clean Architecture • VIPER • Modular Architecture

Backend Integration

REST APIs • GraphQL • WebSockets • Firebase

Cloud & DevOps

AWS • Firebase • Docker • GitHub Actions • Fastlane • Bitrise

Testing & Quality

XCTest • XCUITest • Snapshot Testing • Instruments • CI/CD

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead the development of innovative iOS applications used by global audiences
 - ✦ Exposure to fintech, AI, blockchain, cloud-native technologies, and emerging digital products
 - ✦ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence
 - ✦ Career advancement into Principal iOS Engineer, Mobile Architect, Engineering Manager, Director of Mobile Engineering, or CTO
 - ✦ Strong investment in leadership development, Apple ecosystem training, conference participation, open-source contributions, and continuous professional growth
-

Apply

If you are passionate about building world-class iOS applications, leading high-performing engineering teams, and delivering exceptional mobile experiences with modern Apple technologies, we'd love to connect with you.
