

Senior Software Engineer (Golang)

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are expanding our engineering organization and seeking experienced Golang engineers passionate about building scalable backend systems, distributed infrastructure, and high-performance platform services.

The Opportunity

We are seeking a Senior Software Engineer (Golang) to help architect, develop, and scale backend systems powering fintech and commerce platforms.

In this role, you will work closely with engineering, infrastructure, and product teams to build secure APIs, distributed systems, cloud-native services, and performance-critical applications supporting modern financial technology products.

This is a high-impact engineering role offering strong technical ownership, architectural influence, and the opportunity to contribute directly to scalable infrastructure initiatives.

What You'll Do

Backend & Platform Development

- Design, develop, and maintain scalable backend systems using Golang
- Build secure APIs, microservices, and distributed platform services
- Develop high-performance applications supporting payment systems and infrastructure workflows
- Write clean, maintainable, and production-ready code
- Collaborate with frontend, DevOps, and product teams to deliver end-to-end solutions

Architecture & Scalability

- Contribute to system architecture and technical strategy
- Improve application scalability, reliability, observability, and operational performance
- Build and optimize distributed systems and event-driven services
- Participate in architecture reviews, technical planning, and engineering discussions
- Support cloud-native and microservices-based platform initiatives

Collaboration & Leadership

- Participate in code reviews and technical mentorship
 - Take ownership of projects and engineering initiatives from development through deployment
 - Collaborate cross-functionally with engineering, infrastructure, and product stakeholders
 - Help establish engineering standards and backend best practices
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience
 - Strong expertise in Golang and backend application development
 - Experience building scalable APIs, microservices, and distributed systems
 - Strong understanding of:
 - concurrent and asynchronous programming
 - distributed architecture
 - performance optimization
 - scalability and reliability engineering
 - secure software development practices
 - Experience working with relational and NoSQL databases
 - Familiarity with cloud infrastructure and containerized environments
 - Experience with Git, CI/CD pipelines, and modern engineering workflows
 - Strong communication and problem-solving skills
-

Preferred Experience

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or financial systems
 - Experience with AWS, Docker, Kubernetes, or Terraform
 - Experience with Kafka, RabbitMQ, gRPC, or event-driven architectures
 - Experience building high-throughput backend systems or platform infrastructure
 - Startup or high-growth engineering environment experience
-

Tech Environment

Backend

Golang • REST APIs • gRPC • Microservices

Infrastructure

AWS • Docker • Kubernetes • Terraform • CI/CD

Database & Messaging

PostgreSQL • MongoDB • Redis • Kafka • RabbitMQ

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact engineering ownership
 - ✦ Collaborative and engineering-driven culture
 - ✦ Opportunity to work on innovative fintech and infrastructure platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about Golang engineering, distributed systems, and building scalable infrastructure powering modern financial technology platforms, we'd love to connect with you.
