

# Lead Blockchain Engineer (Rust)

**Rust Development, Blockchain Infrastructure & Web3 Technical Leadership**

-  Remote / Hybrid / Onsite
  -  Full-Time or Part-Time
  -  The Copia Group, LLC
  -  Lead Level
- 

## About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio companies build blockchain infrastructure, DeFi protocols, Layer 1 and Layer 2 networks, digital asset platforms, and enterprise Web3 solutions that are redefining the future of finance.

We are seeking an experienced **Lead Blockchain Engineer (Rust)** to lead the design, architecture, and development of high-performance blockchain infrastructure and distributed systems while mentoring engineering teams and driving technical innovation.

---

# The Opportunity

As a Lead Blockchain Engineer (Rust), you will combine hands-on engineering with technical leadership to build secure, scalable blockchain platforms using Rust. You'll work closely with Product Managers, Blockchain Architects, Smart Contract Engineers, DevOps Engineers, and Engineering Leadership to develop decentralized systems that support millions of transactions and mission-critical blockchain infrastructure.

This role offers significant ownership over blockchain architecture, engineering standards, and platform scalability while providing opportunities to mentor engineers and influence the future of Web3 technologies.

---

## What You'll Do

### Blockchain Engineering

- Design, develop, and maintain blockchain infrastructure using Rust
- Build high-performance blockchain nodes, validators, indexing services, and backend platforms
- Develop secure APIs and services supporting decentralized applications (dApps)
- Optimize blockchain performance, transaction throughput, and network efficiency
- Write clean, maintainable, and production-ready code following industry best practices

### Smart Contract & Protocol Development

- Develop blockchain protocols and backend systems supporting smart contract execution
- Build infrastructure for DeFi protocols, staking platforms, DAOs, and digital asset ecosystems
- Integrate blockchain networks with wallets, exchanges, and third-party infrastructure providers
- Collaborate with Smart Contract Engineers to deliver seamless on-chain and off-chain functionality
- Support multi-chain interoperability and cross-chain communication solutions

### Technical Leadership

- Lead technical architecture discussions and engineering strategy
- Establish blockchain engineering standards and development best practices
- Mentor engineers through code reviews, technical coaching, and architecture guidance
- Drive modernization initiatives and evaluate emerging blockchain technologies

- Promote secure software engineering and blockchain security best practices

## **Cloud & Platform Engineering**

- Design cloud-native distributed systems supporting blockchain infrastructure
  - Build deployment automation and Infrastructure as Code (IaC) solutions
  - Improve observability through monitoring, logging, tracing, and performance analysis
  - Collaborate with DevOps teams to optimize infrastructure scalability and reliability
  - Ensure high availability, disaster recovery, and operational resilience
- 

# **What We're Looking For**

## **Required Qualifications**

### **Experience**

- 7+ years of professional software engineering experience
- 3+ years of production Rust development experience
- 3+ years of blockchain or Web3 engineering experience
- Experience leading engineering teams or large technical initiatives
- Proven experience building distributed systems and cloud-native applications

### **Technical Expertise**

Strong experience with:

- Rust
- Tokio
- Axum or Actix Web
- Cargo
- PostgreSQL
- Redis
- Docker
- Kubernetes
- Git

Strong experience with blockchain technologies:

- Ethereum
- Solidity (integration experience)
- Substrate
- Polkadot ecosystem

- Cosmos SDK (preferred)
- Smart contract integration
- JSON-RPC
- Blockchain indexing
- Wallet integrations

Strong understanding of:

- Distributed systems architecture
  - Blockchain consensus mechanisms
  - Asynchronous programming
  - Cryptography fundamentals
  - DeFi protocols
  - Token standards
  - Event-driven architecture
  - Secure software development
- 

## Preferred Qualifications

- Experience building Layer 1 or Layer 2 blockchain infrastructure
  - Experience developing validators, blockchain nodes, rollups, or blockchain clients
  - Familiarity with Solana, Near, Avalanche, or Aptos ecosystems
  - Experience using Kafka, RabbitMQ, NATS, or Apache Pulsar
  - Knowledge of Infrastructure as Code using Terraform or Pulumi
  - Experience with blockchain security reviews and smart contract auditing processes
  - Active contributions to open-source Rust, Substrate, or blockchain projects
- 

## Technology Environment

### Programming Languages

Rust • Go • TypeScript • Solidity • Python

## **Blockchain Technologies**

Substrate • Ethereum • Polkadot • Cosmos SDK • EVM • Smart Contracts

## **Rust Ecosystem**

Tokio • Axum • Actix Web • Serde • SQLx • Tonic • Cargo

## **Cloud & Infrastructure**

AWS • Docker • Kubernetes • Terraform • GitHub Actions

## **Databases & Messaging**

PostgreSQL • Redis • Kafka • RabbitMQ • NATS

## **Observability & Monitoring**

Prometheus • Grafana • OpenTelemetry • Datadog

## **Tools & Collaboration**

GitHub • Jira • Slack • Notion • Figma

---

# **Why Join Us**

- ✨ Flexible remote, hybrid, and onsite work options
  - ✨ Full-time and part-time opportunities
  - ✨ Competitive compensation package
  - ✨ Opportunity to lead the development of next-generation blockchain infrastructure and decentralized platforms
  - ✨ Exposure to cutting-edge blockchain, DeFi, AI, and emerging technology initiatives
  - ✨ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence
  - ✨ Career advancement into Blockchain Architect, Principal Engineer, Engineering Manager, Director of Engineering, or CTO
  - ✨ Strong investment in leadership development, continuous learning, open-source contributions, and blockchain research
-

# Apply

If you are passionate about Rust, blockchain engineering, and leading teams that build secure, high-performance decentralized infrastructure, we'd love to connect with you.
