

Lead Blockchain Engineer

Blockchain Infrastructure, Smart Contracts & Web3 Platform Leadership

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, digital infrastructure, AI, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the development of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio includes organizations building blockchain infrastructure, DeFi protocols, DAO platforms, tokenization solutions, and Web3 products that are shaping the future of digital finance and ownership.

We are seeking an experienced **Lead Blockchain Engineer** to drive the technical vision, architecture, and implementation of secure, scalable blockchain solutions while mentoring engineering teams and advancing our Web3 initiatives.

The Opportunity

As a Lead Blockchain Engineer, you will combine deep blockchain expertise with technical leadership to deliver production-grade decentralized systems and digital asset platforms. You will work closely with Product Managers, Engineering Leaders, Security Teams, and Infrastructure Engineers to build innovative blockchain products across multiple ecosystems.

This role offers significant ownership over technical strategy, architecture decisions, and engineering excellence while providing opportunities to mentor engineers and influence the future direction of Web3 technologies.

What You'll Do

Blockchain Engineering Leadership

- Lead the design, development, and deployment of blockchain applications and decentralized systems
- Define technical standards, development practices, and architectural guidelines for Web3 initiatives
- Mentor engineers through code reviews, technical coaching, and knowledge sharing
- Drive engineering excellence and continuous improvement across blockchain teams
- Evaluate emerging blockchain technologies and recommend strategic adoption

Smart Contract & Protocol Development

- Design and implement secure smart contracts and decentralized protocols
- Review smart contract architectures for security, scalability, and maintainability
- Develop systems supporting tokenization, staking, governance, and digital asset management
- Collaborate with security teams and external auditors on contract validation and risk mitigation
- Support multi-chain and cross-chain integration initiatives

Backend & Infrastructure Engineering

- Build scalable backend services that interact with blockchain networks and decentralized applications
- Develop blockchain indexing, transaction processing, and event-streaming systems
- Optimize platform performance, reliability, and fault tolerance
- Support cloud-native deployments and infrastructure automation practices

- Improve monitoring, observability, and operational resilience across blockchain environments

Cross-Functional Collaboration

- Partner with Product Managers to translate business requirements into technical solutions
 - Collaborate with Frontend Engineers, DevOps teams, and Security Engineers throughout development cycles
 - Participate in roadmap planning, technical estimation, and architectural discussions
 - Identify and mitigate technical risks proactively
 - Foster a collaborative and innovation-driven engineering culture
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- 3+ years of hands-on blockchain or Web3 development experience
- Proven experience delivering production blockchain applications and distributed systems
- Experience leading technical initiatives or mentoring engineering teams
- Strong background working in Agile development environments

Technical Expertise

Strong experience with:

- Solidity
- Rust, Go, TypeScript, or Node.js
- Ethereum and EVM-compatible blockchains
- Smart contract development frameworks
- Web3 libraries (ethers.js, viem, web3.js)
- REST APIs and GraphQL
- Docker and Kubernetes
- Git-based development workflows

Strong understanding of:

- Blockchain consensus mechanisms
- Distributed systems architecture

- Cryptography fundamentals
 - DeFi protocols and token economics
 - DAO governance frameworks
 - Layer 2 scaling solutions
 - Wallet authentication and transaction management
 - Security best practices for decentralized applications
-

Preferred Qualifications

- Experience building DeFi products, staking protocols, NFT marketplaces, or DAO platforms
 - Experience with Layer 2 ecosystems including Arbitrum, Optimism, Base, Polygon, Avalanche, or zkSync
 - Familiarity with blockchain infrastructure providers such as Alchemy, Infura, QuickNode, Chainlink, or The Graph
 - Experience with Hardhat, Foundry, OpenZeppelin, Tenderly, or other blockchain development tools
 - Experience implementing multi-chain or cross-chain solutions
 - Active contributions to open-source blockchain projects or participation in Web3 communities
-

Technology Environment

Blockchain Technologies

Ethereum • Solidity • Rust • Go • EVM • Smart Contracts • Web3

DeFi & DAO Ecosystems

Uniswap • Aave • Compound • OpenZeppelin • Snapshot • Safe

Web3 Development

ethers.js • viem • Hardhat • Foundry • WalletConnect

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Data & Messaging

PostgreSQL • Redis • MongoDB • Kafka

Observability & Security

Prometheus • Grafana • Datadog • OpenTelemetry

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead next-generation blockchain and Web3 engineering initiatives
 - ✦ Exposure to innovative DeFi, DAO, tokenization, and digital asset projects
 - ✦ Collaborative, engineering-first culture focused on ownership and innovation
 - ✦ Career advancement into Blockchain Architect, Engineering Manager, or Principal Engineer roles
 - ✦ Strong investment in continuous learning, open-source contributions, and emerging technologies
-

Apply

If you are passionate about blockchain engineering, decentralized technologies, and leading teams that build secure, scalable Web3 platforms, we'd love to connect with you.
