

Lead Platform Engineer

Cloud Infrastructure, Developer Platforms & Scalable Systems

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of modern financial services, developer platforms, cloud infrastructure, and scalable technology solutions that enable businesses to innovate and grow.

We are seeking an experienced **Lead Platform Engineer** to lead the design, implementation, and evolution of our cloud platform, developer infrastructure, and internal engineering tools.

The Opportunity

As a Lead Platform Engineer, you will drive the technical direction of our platform engineering initiatives, building secure, scalable, and reliable infrastructure that empowers engineering teams to deliver software efficiently.

You will collaborate with Software Engineers, DevOps Engineers, Security teams, and Product Leadership to create cloud-native platforms, automate operational workflows, and improve developer productivity across the organization.

This role combines hands-on engineering with technical leadership and platform strategy.

What You'll Do

Platform Engineering Leadership

- Lead the architecture, development, and evolution of cloud platform infrastructure
- Establish engineering standards, platform best practices, and operational guidelines
- Mentor platform engineers and foster a culture of technical excellence
- Drive technical strategy for developer infrastructure and internal platforms
- Influence infrastructure roadmaps and long-term platform investments

Cloud Infrastructure & Automation

- Design and maintain scalable cloud-native infrastructure
- Build and improve Infrastructure as Code (IaC) solutions
- Develop self-service platform capabilities for engineering teams
- Automate provisioning, deployment, monitoring, and operational workflows
- Support highly available, secure, and resilient production environments

Developer Experience

- Improve CI/CD pipelines and software delivery workflows
- Build internal developer tools that streamline engineering productivity
- Standardize deployment processes across applications and services
- Optimize build systems, release automation, and developer environments
- Enhance platform observability, monitoring, and operational visibility

Reliability & Security

- Improve platform scalability, availability, and disaster recovery capabilities
 - Implement monitoring, logging, tracing, and alerting solutions
 - Partner with Security teams to strengthen infrastructure security and compliance
 - Lead incident response, root cause analysis, and operational improvements
 - Promote DevSecOps and Site Reliability Engineering (SRE) best practices
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional experience in Platform Engineering, DevOps, Site Reliability Engineering, or Cloud Infrastructure
- 2+ years of experience leading technical projects or mentoring engineering teams
- Proven experience building cloud-native infrastructure supporting production applications
- Experience working in Agile and fast-paced engineering environments

Technical Expertise

Strong experience with:

- AWS, Azure, or Google Cloud Platform
- Kubernetes
- Docker
- Terraform
- Infrastructure as Code
- Linux administration
- CI/CD pipeline design
- Git-based development workflows

Strong understanding of:

- Cloud-native architectures
 - Platform engineering principles
 - Distributed systems
 - Networking and cloud security
 - Infrastructure automation
 - Observability and monitoring
 - Performance optimization
 - High availability and disaster recovery
-

Preferred Qualifications

- Experience working in fintech, payments, SaaS, or enterprise cloud platforms
 - Experience building Internal Developer Platforms (IDPs)
 - Familiarity with GitHub Actions, Jenkins, GitLab CI, or ArgoCD
 - Experience with Service Mesh technologies such as Istio or Linkerd
 - Experience implementing SRE principles and operational excellence practices
 - AWS, Kubernetes, Terraform, or cloud platform certifications are a plus
-

Technology Environment

Cloud Platforms

AWS • Azure • Google Cloud Platform

Containers & Orchestration

Docker • Kubernetes • Helm • ArgoCD

Infrastructure as Code

Terraform • CloudFormation • Ansible

CI/CD & Automation

GitHub Actions • Jenkins • GitLab CI • CircleCI

Observability

Prometheus • Grafana • Datadog • ELK Stack • OpenTelemetry

Languages & Scripting

Go • Python • Bash • YAML

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to build and lead next-generation platform engineering initiatives
 - ✦ Exposure to innovative fintech and emerging technology projects
 - ✦ Collaborative, engineering-first culture focused on automation and scalability
 - ✦ Career advancement into Staff Engineer, Principal Engineer, or Engineering Management
 - ✦ Strong investment in technical innovation, developer experience, and continuous learning
-

Apply

If you are passionate about platform engineering, cloud infrastructure, and building reliable systems that empower engineering teams to innovate faster, we'd love to connect with you.
