About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help support the development of modern financial services, payment technologies, developer platforms, and scalable software solutions used by businesses worldwide.

We are seeking an experienced Lead Software Engineer to help drive technical excellence, lead critical engineering initiatives, and deliver scalable software systems that support business growth and innovation.

The Opportunity

As a Lead Software Engineer, you will combine hands-on software development with technical leadership, helping guide engineering teams through complex technical challenges while contributing directly to product and platform development.

You will collaborate closely with engineers, product managers, designers, and stakeholders to architect scalable solutions, mentor team members, and ensure successful project delivery.

This role is ideal for an experienced engineer who enjoys leading by example and influencing both technical direction and engineering culture.

What You'll Do

Technical Leadership

- Lead the design and development of scalable software applications and platform services
- Drive technical decision-making and architectural discussions across engineering teams
- Establish engineering standards, best practices, and development processes
- Conduct code reviews and provide technical mentorship to engineers
- Help identify and resolve complex technical challenges and system bottlenecks

Software Development

- Design, build, and maintain high-quality software solutions
- Develop scalable APIs, backend services, and platform infrastructure
- Collaborate on frontend, backend, cloud, and distributed systems initiatives
- Write clean, maintainable, and well-tested production code
- Support software deployment, monitoring, and operational excellence

Project & Team Leadership

- Partner with Product Managers and stakeholders to define technical requirements
- Lead engineering projects from planning through successful delivery
- Assist with sprint planning, estimation, and technical prioritization
- Coordinate cross-functional efforts across engineering and business teams
- Promote a collaborative, high-performance engineering culture

Continuous Improvement

- Drive improvements in scalability, reliability, security, and performance
 - Champion automation, testing, and development efficiency initiatives
 - Support platform modernization and cloud transformation efforts
 - Evaluate new technologies and recommend strategic adoption where appropriate
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- Proven experience leading technical projects and engineering initiatives
- Experience mentoring engineers and providing technical leadership
- Strong track record of delivering scalable software systems in production environments

Technical Expertise

Strong proficiency in one or more of the following:

- Java
- Python
- Go
- TypeScript
- C#
- Kotlin

Strong understanding of:

- Software architecture and design patterns
- Distributed systems and microservices
- Cloud-native development
- API design and integration
- Database architecture and optimization
- Security and reliability engineering
- CI/CD and DevOps practices

Leadership Skills

- Strong communication and collaboration abilities
 - Ability to influence technical decisions across teams
 - Excellent problem-solving and analytical skills
 - Ability to balance hands-on development with technical leadership responsibilities
 - Strong ownership mindset and attention to detail
-

Preferred Qualifications

- Experience in fintech, payments, SaaS, cloud infrastructure, or platform engineering
 - Familiarity with modern payment ecosystems and financial technology platforms
 - Experience working with AWS, Kubernetes, Docker, and Terraform
 - Experience leading distributed or remote engineering teams
 - Experience supporting high-scale applications and transactional systems
 - Startup, scale-up, or high-growth technology company experience
-

Technology Environment

Languages & Frameworks

Java • Python • Go • TypeScript • Kotlin • .NET

Cloud & Infrastructure

AWS • Kubernetes • Docker • Terraform

Data & Messaging

PostgreSQL • Redis • Kafka • Event-Driven Architectures

Engineering Tools

GitHub • Jira • Slack • Notion • CI/CD Pipelines

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
- ✦ Full-time and part-time opportunities
- ✦ Competitive compensation package
- ✦ Opportunity to lead impactful engineering initiatives
- ✦ Exposure to innovative fintech and emerging technology projects

- ✨ Collaborative and engineering-focused culture
 - ✨ Career advancement into Staff, Principal, or Engineering Management paths
 - ✨ Strong emphasis on technical excellence and continuous learning
-

Apply

If you are passionate about building scalable software, mentoring engineers, and leading technical initiatives that drive meaningful business impact, we'd love to connect with you.
