

Senior Blockchain Engineer

Web3 Infrastructure & Digital Asset Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, blockchain, digital infrastructure, and emerging technology sectors.

We collaborate with projects connected to modern financial ecosystems, decentralized technologies, digital asset platforms, and next-generation commerce infrastructure. Our teams work closely with organizations building scalable blockchain applications, Web3 systems, and developer-focused platforms.

We are expanding our blockchain engineering organization and seeking experienced engineers passionate about building secure, scalable, and high-performance decentralized systems.

The Opportunity

We are seeking a Senior Blockchain Engineer to help architect, develop, and scale blockchain infrastructure, smart contract systems, and decentralized applications.

In this role, you will work closely with engineering, product, and infrastructure teams to build secure blockchain-based services, wallet integrations, transaction systems, and Web3 platform infrastructure supporting modern digital asset ecosystems.

This is a high-impact engineering role offering strong technical ownership, architectural influence, and the opportunity to contribute directly to next-generation blockchain platforms.

What You'll Do

Blockchain & Smart Contract Development

- Design, develop, and maintain blockchain-based applications and smart contracts
- Build secure decentralized systems supporting digital asset and transaction workflows
- Develop smart contract integrations, token systems, and on-chain infrastructure
- Implement wallet connectivity and blockchain interaction layers
- Write clean, secure, and production-ready code

Platform & Infrastructure Engineering

- Build scalable backend services and APIs supporting blockchain applications
- Improve blockchain infrastructure reliability, scalability, and operational performance
- Support distributed systems, node infrastructure, and cloud-native deployments
- Optimize transaction processing, monitoring, and system observability
- Participate in architecture reviews and technical planning discussions

Collaboration & Leadership

- Collaborate cross-functionally with frontend, backend, DevOps, and product teams
 - Participate in code reviews and technical mentorship
 - Take ownership of engineering initiatives from development through deployment
 - Contribute to blockchain engineering standards and security best practices
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience
 - Strong experience with blockchain development and decentralized applications
 - Expertise in:
 - Solidity
 - Ethereum or EVM-compatible ecosystems
 - smart contract development
 - Web3 integrations
 - decentralized system architecture
 - Experience building scalable APIs, backend systems, and blockchain services
 - Strong understanding of:
 - blockchain consensus and transaction workflows
 - wallet infrastructure and token standards
 - distributed systems and scalability
 - smart contract security best practices
 - cloud-native infrastructure and deployment workflows
 - Familiarity with databases, CI/CD pipelines, and containerized environments
 - Strong communication and problem-solving skills
-

Preferred Experience

- Experience working with DeFi, digital asset platforms, or blockchain infrastructure products
 - Familiarity with Layer 2 ecosystems, cross-chain systems, or interoperability solutions
 - Experience with Rust, Go, Node.js, or TypeScript
 - Experience with Hardhat, Foundry, ethers.js, or Web3 tooling
 - Experience with AWS, Docker, Kubernetes, or distributed cloud infrastructure
 - Startup or high-growth Web3 engineering environment experience
-

Tech Environment

Blockchain & Web3

Solidity • Ethereum • EVM • Hardhat • Foundry • ethers.js

Backend & Infrastructure

Node.js • TypeScript • Go • Rust • REST APIs

Cloud & DevOps

AWS • Docker • Kubernetes • CI/CD

Database & Messaging

PostgreSQL • Redis • Kafka

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact engineering ownership
 - ✦ Collaborative and innovation-driven culture
 - ✦ Opportunity to work on modern blockchain and digital infrastructure platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about blockchain engineering, decentralized systems, and building scalable Web3 infrastructure powering modern digital platforms, we'd love to connect with you.
