

# Senior DevOps Engineer

## Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
  -  Full-Time or Part-Time
  -  The Copia Group, LLC
  -  Senior Level
- 

## About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are expanding our infrastructure and platform engineering organization and seeking experienced DevOps professionals passionate about building secure, scalable, and reliable cloud infrastructure.

---

## The Opportunity

We are seeking a Senior DevOps Engineer to help architect, automate, and scale cloud infrastructure and deployment systems supporting modern fintech and commerce platforms.

In this role, you will work closely with engineering, security, and platform teams to improve infrastructure reliability, deployment workflows, system scalability, and operational excellence across distributed applications and cloud-native environments.

This is a high-impact role offering strong technical ownership, infrastructure leadership, and the opportunity to shape modern engineering operations.

---

## What You'll Do

### Infrastructure & Cloud Operations

- Design, deploy, and maintain scalable cloud infrastructure environments
- Manage infrastructure across AWS, Kubernetes, Docker, and cloud-native systems
- Improve system reliability, scalability, availability, and security
- Automate infrastructure provisioning and operational workflows
- Monitor production environments and respond to operational incidents

### CI/CD & Automation

- Build and maintain CI/CD pipelines for modern development workflows
- Improve deployment automation, release processes, and infrastructure tooling
- Implement Infrastructure as Code (IaC) practices using Terraform or similar tools
- Optimize developer experience and operational efficiency across engineering teams

### Security & Reliability

- Implement infrastructure security best practices and access controls
- Support monitoring, observability, logging, and incident response systems
- Improve disaster recovery, backup strategies, and operational resilience
- Collaborate with engineering teams on performance optimization and system architecture

### Collaboration & Leadership

- Work closely with software engineers, platform teams, and product stakeholders
  - Participate in technical planning, infrastructure strategy, and architecture discussions
  - Mentor engineers and contribute to DevOps best practices and operational standards
  - Support scalable engineering operations in fast-paced product environments
-

# What We're Looking For

## Required Experience

- 5+ years of DevOps, Site Reliability Engineering, or infrastructure engineering experience
  - Strong experience with AWS or other cloud platforms
  - Experience managing Kubernetes, Docker, and containerized applications
  - Strong understanding of CI/CD pipelines and deployment automation
  - Experience with Infrastructure as Code tools such as Terraform or CloudFormation
  - Strong understanding of:
    - cloud infrastructure
    - networking and security
    - monitoring and observability
    - scalability and reliability engineering
    - Linux systems and automation scripting
  - Experience with Git-based development workflows and modern engineering environments
  - Strong troubleshooting, communication, and collaboration skills
- 

## Preferred Experience

- Experience working in fintech, payments, SaaS, or infrastructure platforms
  - Familiarity with Stripe APIs or payment systems
  - Experience with observability tools such as Prometheus, Grafana, Datadog, or ELK Stack
  - Experience with distributed systems and microservices architecture
  - Knowledge of security compliance and infrastructure hardening practices
  - Startup or high-growth engineering environment experience
-

# Tech Environment

## Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform

## CI/CD & Automation

GitHub Actions • Jenkins • GitLab CI • ArgoCD

## Monitoring & Observability

Prometheus • Grafana • Datadog • ELK Stack

## Systems & Tools

Linux • Bash • Python • Git • Networking

---

# Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
  - ✦ Full-time and part-time opportunities
  - ✦ Competitive compensation
  - ✦ High-impact infrastructure ownership
  - ✦ Collaborative and engineering-driven culture
  - ✦ Opportunity to work on innovative fintech and infrastructure platforms
  - ✦ Long-term growth and leadership opportunities
- 

# Apply

If you are passionate about cloud infrastructure, automation, scalability, and building reliable systems powering modern financial technology, we'd love to connect with you.
