

Senior Frontend Engineer (Angular)

Enterprise Web Applications, Modern UI Architecture & User Experience

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, AI, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of technology-driven businesses building scalable software platforms, financial services, enterprise solutions, and digital products. Our portfolio companies rely on modern web technologies to deliver exceptional user experiences and mission-critical applications.

We are seeking an experienced **Senior Frontend Engineer (Angular)** to build high-performance, scalable, and user-centric web applications that support next-generation digital products.

The Opportunity

As a Senior Frontend Engineer, you will lead the development of sophisticated web applications using Angular and modern frontend technologies. You'll work closely with Product Managers, Designers, Backend Engineers, and QA teams to deliver intuitive, responsive, and highly maintainable user interfaces.

This role offers significant ownership over frontend architecture, component design, and engineering best practices while providing opportunities to mentor team members and influence technical direction across multiple products.

What You'll Do

Frontend Development

- Design, develop, and maintain enterprise-grade web applications using Angular
- Build reusable, scalable UI components and frontend libraries
- Create responsive, accessible, and mobile-friendly user experiences
- Optimize application performance, load times, and user interactions
- Develop clean, maintainable, and well-tested production code

Architecture & Engineering Excellence

- Define frontend architecture patterns and technical standards
- Implement modern state management and component-based design principles
- Conduct code reviews and promote engineering best practices
- Improve testing strategies, application monitoring, and development workflows
- Ensure high standards for security, accessibility, and application quality

Collaboration & Product Delivery

- Partner with Product Managers and Designers to transform requirements into elegant solutions
- Collaborate with Backend Engineers to integrate APIs and real-time services
- Participate in sprint planning, technical estimation, and architectural discussions
- Support QA teams in delivering reliable and high-quality releases
- Contribute to continuous improvements across the software development lifecycle

Mentorship & Leadership

- Mentor junior and mid-level engineers through technical guidance and code reviews
 - Share knowledge across frontend communities and engineering teams
 - Advocate for modern frontend technologies and development practices
 - Help establish scalable development processes and coding standards
 - Foster a collaborative, innovation-driven engineering culture
-

What We're Looking For

Required Qualifications

Experience

- 5+ years of professional frontend software engineering experience
- 3+ years of hands-on Angular development experience
- Proven experience building large-scale web applications in production environments
- Experience working in Agile software development teams

Technical Expertise

Strong experience with:

- Angular (v14+)
- TypeScript
- JavaScript (ES6+)
- RxJS
- NgRx or other state management libraries
- HTML5 and CSS3
- SCSS/SASS
- REST APIs and GraphQL
- Git and modern development workflows

Strong understanding of:

- Component-driven architecture
- Reactive programming principles
- Frontend performance optimization
- Responsive and mobile-first design
- Accessibility standards (WCAG)
- Testing methodologies and frontend automation
- Secure frontend development practices

Preferred Qualifications

- Experience working in fintech, SaaS, enterprise software, or digital platform environments
 - Familiarity with Angular Material, PrimeNG, or other enterprise UI frameworks
 - Experience with micro-frontend architectures
 - Experience with server-side rendering (SSR) and Angular Universal
 - Knowledge of CI/CD pipelines and cloud deployment environments
 - Experience mentoring engineers and contributing to frontend architecture decisions
-

Technology Environment

Frontend Technologies

Angular • TypeScript • RxJS • NgRx • Angular Material • SCSS

Testing & Quality

Jasmine • Karma • Cypress • Playwright • ESLint

Backend Integration

REST APIs • GraphQL • WebSockets

Cloud & DevOps

AWS • Docker • GitHub Actions • CI/CD Pipelines

Design & Collaboration

Figma • GitHub • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities

- ✨ Competitive compensation package
 - ✨ Opportunity to build modern digital products across innovative industries
 - ✨ Exposure to fintech, AI, and emerging technology initiatives
 - ✨ Collaborative, engineering-first culture focused on ownership and technical excellence
 - ✨ Career advancement into Lead Engineer, Staff Engineer, or Engineering Management
 - ✨ Strong investment in continuous learning, mentorship, and professional growth
-

Apply

If you are passionate about Angular development, modern frontend architecture, and building exceptional user experiences that power innovative digital products, we'd love to connect with you.
