

Senior QA Engineer

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and next-generation commerce solutions used by businesses globally.

We are expanding our quality engineering team and looking for experienced QA professionals passionate about building reliable, secure, and high-quality software products.

The Opportunity

We are seeking a Senior QA Engineer to help ensure the quality, reliability, and performance of modern fintech and commerce platforms.

You will work closely with engineering, product, and design teams to develop testing strategies, improve quality processes, and deliver stable, scalable applications across web platforms, APIs, and backend systems.

This role offers strong ownership, cross-functional collaboration, and the opportunity to contribute directly to high-impact infrastructure products.

What You'll Do

Quality Assurance & Testing

- Design, develop, and execute manual and automated test plans
- Perform functional, regression, integration, API, and end-to-end testing
- Identify, document, and track software defects and inconsistencies
- Validate frontend, backend, and platform functionality across multiple environments
- Ensure software quality, reliability, usability, and performance

Automation & Process Improvement

- Build and maintain automated testing frameworks and scripts
- Improve QA workflows, testing coverage, and release processes
- Collaborate with engineers to integrate automated testing into CI/CD pipelines
- Contribute to quality standards, testing strategies, and best practices

Collaboration & Ownership

- Work closely with frontend, backend, DevOps, and product teams
 - Participate in sprint planning, technical discussions, and release reviews
 - Help establish scalable QA processes for fast-moving engineering teams
 - Mentor junior QA engineers and support cross-team quality initiatives
-

What We're Looking For

Required Experience

- 5+ years of professional QA or software testing experience
- Strong experience with manual and automated testing methodologies

- Experience testing modern web applications, APIs, and backend systems
- Familiarity with automation tools such as Cypress, Playwright, Selenium, or similar frameworks
- Experience with API testing tools such as Postman or Insomnia
- Understanding of CI/CD workflows and modern development environments
- Strong understanding of software development lifecycle and QA best practices
- Excellent analytical, problem-solving, and communication skills

Nice to Have

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or payment workflows
 - Experience with performance, load, or security testing
 - Knowledge of SQL and database validation
 - Experience in startup or high-growth engineering environments
-

Tech Stack

Testing & Automation

Cypress • Playwright • Selenium • Postman

Frontend & Backend

React • TypeScript • Node.js • REST APIs

Infrastructure

AWS • Docker • CI/CD Pipelines

Tools & Collaboration

Git • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation
- ✨ High-impact role with strong ownership
- ✨ Modern engineering culture and collaborative environment

- ✦ Opportunity to work on innovative fintech and infrastructure projects
 - ✦ Long-term growth and career development opportunities
-

Apply

If you are passionate about software quality, automation, and building reliable technology products at scale, we'd love to connect with you.
