

Senior Software Engineer (Java)

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are expanding our engineering organization and seeking experienced Java engineers passionate about building scalable backend systems, distributed services, and high-performance infrastructure platforms.

The Opportunity

We are seeking a Senior Software Engineer (Java) to help architect, develop, and scale modern backend systems powering fintech and commerce applications.

In this role, you will work closely with engineering, product, and infrastructure teams to build secure, reliable, and scalable services supporting payment workflows, APIs, and platform infrastructure.

This is a high-impact engineering role offering strong technical ownership, architectural influence, and the opportunity to contribute directly to large-scale platform initiatives.

What You'll Do

Backend & Platform Development

- Design, develop, and maintain scalable backend systems using Java and modern frameworks
- Build secure APIs, distributed services, and platform infrastructure supporting fintech and commerce applications
- Develop clean, maintainable, and production-ready code
- Collaborate with frontend, DevOps, and product teams to deliver end-to-end solutions
- Support high-availability systems handling large-scale transaction and platform workloads

Architecture & Scalability

- Contribute to system architecture and technical strategy
- Improve application performance, scalability, reliability, and maintainability
- Participate in architecture reviews, technical planning, and engineering discussions
- Help establish development standards, testing strategies, and engineering best practices
- Support cloud-native and microservices-based platform initiatives

Collaboration & Leadership

- Participate in code reviews and mentorship across engineering teams
 - Take ownership of technical projects from development through deployment
 - Collaborate cross-functionally with engineering, infrastructure, and business stakeholders
 - Contribute to long-term platform and engineering improvements
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience
 - Strong expertise in Java and backend application development
 - Experience with frameworks such as Spring Boot, Spring MVC, or Hibernate
 - Experience building RESTful APIs and distributed backend services
 - Strong understanding of:
 - scalable backend architecture
 - microservices and distributed systems
 - database design and optimization
 - performance tuning and reliability
 - secure software development practices
 - Experience with relational and NoSQL databases
 - Familiarity with cloud platforms, CI/CD pipelines, and containerized environments
 - Strong communication and problem-solving skills
-

Preferred Experience

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or financial systems
 - Experience with Kafka, Redis, or event-driven architecture
 - Experience with AWS, Docker, Kubernetes, or Terraform
 - Startup or high-growth engineering environment experience
 - Experience building large-scale transactional or platform systems
-

Tech Environment

Backend

Java • Spring Boot • Hibernate • REST APIs

Infrastructure

AWS • Docker • Kubernetes • CI/CD

Database & Messaging

PostgreSQL • MySQL • MongoDB • Redis • Kafka

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact engineering ownership
 - ✦ Collaborative and engineering-driven culture
 - ✦ Opportunity to work on innovative fintech and infrastructure platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about backend engineering, distributed systems, and building scalable financial technology platforms, we'd love to connect with you.
