

Senior Software Engineer (Rust)

Fintech Infrastructure & High-Performance Systems

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are expanding our engineering organization and seeking experienced Rust engineers passionate about building high-performance systems, scalable infrastructure, and secure backend platforms.

The Opportunity

We are seeking a Senior Software Engineer (Rust) to help architect, develop, and scale modern backend infrastructure powering fintech and commerce platforms.

In this role, you will work on distributed systems, low-latency services, platform infrastructure, APIs, and performance-critical applications while collaborating closely with engineering, infrastructure, and product teams.

This is a high-impact engineering role offering strong technical ownership, architectural influence, and the opportunity to contribute directly to next-generation financial infrastructure systems.

What You'll Do

Backend & Systems Engineering

- Design, develop, and maintain scalable backend systems using Rust
- Build secure APIs, distributed services, and high-performance platform infrastructure
- Develop low-latency applications supporting financial workflows and transaction systems
- Write clean, maintainable, and production-ready code
- Collaborate with frontend, DevOps, and product teams to deliver end-to-end solutions

Architecture & Performance

- Contribute to system architecture and technical strategy
- Optimize application performance, concurrency, reliability, and scalability
- Build and maintain distributed systems and event-driven services
- Improve observability, monitoring, and operational performance
- Participate in technical planning, architecture reviews, and engineering discussions

Collaboration & Leadership

- Participate in code reviews and technical mentorship
 - Take ownership of technical initiatives from development through deployment
 - Collaborate cross-functionally with engineering, infrastructure, and product stakeholders
 - Help establish backend engineering standards and Rust best practices
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience
 - Strong expertise in Rust and systems/backend programming
 - Experience building scalable backend services and distributed systems
 - Strong understanding of:
 - concurrent and asynchronous programming
 - systems architecture
 - memory-safe programming
 - performance optimization
 - scalability and reliability engineering
 - secure software development practices
 - Experience working with APIs, microservices, and cloud-native systems
 - Familiarity with relational and NoSQL databases
 - Experience with containerized environments and CI/CD workflows
 - Strong analytical, communication, and problem-solving skills
-

Preferred Experience

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or financial systems
 - Experience with Tokio, Actix, Axum, or async Rust ecosystems
 - Experience with AWS, Docker, Kubernetes, or Terraform
 - Experience with Kafka, gRPC, or event-driven architectures
 - Startup or high-growth engineering environment experience
-

Tech Environment

Backend & Systems

Rust • Tokio • Axum • Actix • REST APIs • gRPC

Infrastructure

AWS • Docker • Kubernetes • Terraform • CI/CD

Database & Messaging

PostgreSQL • Redis • MongoDB • Kafka

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact engineering ownership
 - ✦ Collaborative and engineering-driven culture
 - ✦ Opportunity to work on innovative fintech and infrastructure platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about Rust engineering, distributed systems, and building high-performance infrastructure powering modern financial technology platforms, we'd love to connect with you.
