About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, AI, blockchain, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of technology-driven businesses by delivering scalable platforms, cloud-native solutions, and enterprise-grade software. Our portfolio companies are building the next generation of financial services, intelligent applications, and decentralized technologies that power global businesses.

We are seeking an experienced **Senior Solution Architect** to design innovative, scalable technology solutions that align business objectives with modern software architecture and cloud technologies.

The Opportunity

As a Senior Solution Architect, you will serve as a trusted technical advisor, working closely with business stakeholders, Product Managers, Engineering teams, and executive leadership to define solution architectures for complex technology initiatives. You'll lead architecture design, guide implementation strategies, and ensure solutions are scalable, secure, and aligned with long-term business goals.

This role combines deep technical expertise with strategic thinking, offering the opportunity to influence enterprise architecture while mentoring engineering teams across multiple products and platforms.

What You'll Do

Solution Architecture

- Design end-to-end technical solutions that align with business and product objectives
- Develop scalable architecture for enterprise applications, cloud platforms, APIs, and distributed systems
- Produce solution blueprints, architecture diagrams, and technical documentation
- Evaluate technical trade-offs and recommend optimal technologies and implementation strategies
- Ensure architecture aligns with security, scalability, reliability, and performance requirements

Technical Leadership

- Lead architecture reviews and technical design sessions across engineering teams
- Establish architecture standards, governance, and engineering best practices
- Mentor software engineers and technical leads on architecture principles and solution design
- Drive modernization initiatives and technology adoption across multiple platforms
- Provide technical leadership throughout the entire software development lifecycle

Cloud & Platform Strategy

- Design cloud-native applications using modern infrastructure and microservices
- Develop API strategies, integration patterns, and event-driven architectures
- Define Infrastructure as Code (IaC) and deployment automation approaches
- Ensure systems are highly available, resilient, and operationally efficient

- Collaborate with DevOps teams to optimize cloud infrastructure and CI/CD pipelines

Business & Stakeholder Collaboration

- Partner with Product Managers and business leaders to translate requirements into technical solutions
 - Work closely with Engineering Managers to align architecture with delivery roadmaps
 - Present technical proposals and architectural recommendations to executive stakeholders
 - Support project planning, technical estimation, and risk management
 - Drive cross-functional collaboration across engineering, security, infrastructure, and operations teams
-

What We're Looking For

Required Qualifications

Experience

- 8+ years of professional software engineering or solution architecture experience
- 3+ years of experience designing enterprise-scale solution architectures
- Proven experience delivering complex software platforms in production environments
- Experience leading architecture initiatives across multiple engineering teams
- Strong background working within Agile software development environments

Technical Expertise

Strong experience with:

- Cloud Architecture (AWS, Azure, or Google Cloud Platform)
- Microservices Architecture
- REST APIs and GraphQL
- Distributed Systems
- SQL and NoSQL Databases
- Docker
- Kubernetes
- Git

Strong understanding of:

- Enterprise Architecture
- Domain-Driven Design (DDD)

- Event-Driven Architecture
 - Integration Patterns
 - API Security and Identity Management
 - Infrastructure as Code (Terraform or CloudFormation)
 - CI/CD and DevOps practices
 - Software Architecture Patterns and Design Principles
-

Preferred Qualifications

- Experience designing solutions for fintech, AI, blockchain, SaaS, healthcare, or enterprise software platforms
 - Knowledge of blockchain infrastructure, Web3 architectures, or digital asset platforms
 - Experience integrating AI/ML services, data platforms, or generative AI applications
 - Familiarity with Kafka, RabbitMQ, Apache Pulsar, or event-driven messaging systems
 - Cloud certifications such as AWS Certified Solutions Architect, Microsoft Azure Solutions Architect Expert, or Google Professional Cloud Architect
 - Experience presenting technical strategies to executive leadership and external stakeholders
-

Technology Environment

Architecture & Design

Enterprise Architecture • Solution Architecture • Domain-Driven Design • Microservices • Event-Driven Systems

Programming & APIs

Java • .NET • Go • Python • Node.js • REST APIs • GraphQL

Cloud & Infrastructure

AWS • Azure • Google Cloud Platform • Docker • Kubernetes • Terraform

Databases & Messaging

PostgreSQL • MySQL • MongoDB • Redis • Kafka • RabbitMQ

DevOps & Observability

GitHub Actions • Jenkins • Prometheus • Grafana • OpenTelemetry

Tools & Collaboration

GitHub • Jira • Confluence • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to architect innovative enterprise platforms and next-generation technology solutions
 - ✦ Exposure to fintech, AI, blockchain, cloud-native technologies, and emerging digital products
 - ✦ Collaborative, engineering-first culture focused on innovation, strategic thinking, and technical excellence
 - ✦ Career advancement into Principal Architect, Enterprise Architect, Head of Architecture, Director of Engineering, or CTO
 - ✦ Strong investment in leadership development, cloud certifications, continuous learning, and technical innovation
-

Apply

If you are passionate about designing scalable technology solutions, solving complex business challenges through architecture, and shaping the future of modern software platforms, we'd love to connect with you.
