

Senior Web3 Software Engineer

Blockchain Infrastructure, Smart Contracts & Decentralized Applications

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, digital infrastructure, AI, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the development of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio includes companies building blockchain infrastructure, Web3 applications, decentralized finance (DeFi) solutions, and innovative digital products transforming the future of finance and the internet.

We are seeking an experienced **Senior Web3 Software Engineer** to develop secure, scalable, and high-performance blockchain applications and decentralized systems that power the next generation of Web3 innovation.

The Opportunity

As a Senior Web3 Software Engineer, you will be responsible for designing, building, and maintaining blockchain-enabled applications, backend services, and decentralized infrastructure. You'll collaborate with Product Managers, Blockchain Architects, Frontend Engineers, and DevOps teams to deliver secure, scalable, and production-ready Web3 solutions.

This role offers significant technical ownership, architectural influence, and the opportunity to contribute to cutting-edge blockchain technologies across decentralized finance (DeFi), DAOs, tokenized assets, and digital identity platforms.

What You'll Do

Web3 Application Development

- Design, develop, and maintain decentralized applications (dApps) and blockchain-enabled services
- Build scalable backend systems that interact with smart contracts and blockchain networks
- Develop secure APIs and middleware supporting Web3 applications
- Integrate wallet authentication, digital assets, and blockchain transactions into modern applications
- Write clean, maintainable, and well-tested production code

Blockchain Engineering

- Develop and integrate smart contracts using modern blockchain development frameworks
- Build services that interact with Ethereum and EVM-compatible networks
- Implement blockchain event listeners, indexing services, and transaction processing systems
- Optimize blockchain interactions for security, performance, and reliability
- Support multi-chain architectures and cross-chain interoperability initiatives

Architecture & Platform Engineering

- Design scalable distributed systems supporting decentralized applications
- Improve application performance, fault tolerance, and operational reliability
- Implement cloud-native infrastructure and deployment automation

- Contribute to architectural decisions and technical roadmaps
- Promote engineering best practices across Web3 development initiatives

Collaboration & Technical Leadership

- Partner with Product Managers, Designers, Infrastructure Engineers, and Security teams
 - Participate in architecture reviews, sprint planning, and technical discussions
 - Mentor junior engineers through code reviews and technical guidance
 - Stay current with emerging blockchain technologies and ecosystem developments
 - Contribute to a collaborative, engineering-first culture focused on continuous improvement
-

What We're Looking For

Required Qualifications

Experience

- 5+ years of professional software engineering experience
- 2+ years of experience building blockchain or Web3 applications
- Experience delivering production-ready decentralized applications or blockchain infrastructure
- Strong understanding of Agile software development methodologies

Technical Expertise

Strong experience with:

- TypeScript or JavaScript
- Node.js
- Solidity
- React or Next.js
- REST APIs and GraphQL
- PostgreSQL or MongoDB
- Git and modern software development workflows

Strong understanding of:

- Ethereum and EVM-compatible blockchains
- Smart contract development and deployment
- Wallet integrations (MetaMask, WalletConnect)
- Web3 libraries such as **ethers.js**, **viem**, or **web3.js**

- Blockchain security best practices
 - Distributed systems and event-driven architectures
 - Cloud-native application development
-

Preferred Qualifications

- Experience with Layer 2 ecosystems including Arbitrum, Optimism, Base, Polygon, or zkSync
 - Experience building DeFi protocols, staking platforms, NFT marketplaces, or DAO governance systems
 - Familiarity with blockchain infrastructure providers such as Alchemy, Infura, QuickNode, or Chainlink
 - Experience using Hardhat, Foundry, or Truffle development frameworks
 - Experience with Docker, Kubernetes, Terraform, and cloud platforms including AWS or GCP
 - Contributions to open-source blockchain projects or active participation in the Web3 community
-

Technology Environment

Web3 & Blockchain

Ethereum • Solidity • Ethers.js • viem • Web3.js • Hardhat • Foundry

Frontend

React • Next.js • TypeScript • Tailwind CSS

Backend

Node.js • NestJS • Express • GraphQL • REST APIs

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Databases & Messaging

PostgreSQL • MongoDB • Redis • Kafka

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
 - ✨ Full-time and part-time opportunities
 - ✨ Competitive compensation package
 - ✨ Opportunity to build innovative Web3 products and blockchain infrastructure
 - ✨ Exposure to cutting-edge DeFi, DAO, tokenization, and digital asset initiatives
 - ✨ Collaborative, engineering-first culture focused on ownership and innovation
 - ✨ Career advancement into Staff Engineer, Blockchain Architect, or Engineering Leadership
 - ✨ Strong investment in continuous learning, open-source contribution, and emerging technologies
-

Apply

If you are passionate about decentralized technologies, blockchain engineering, and building secure, scalable Web3 applications that shape the future of digital innovation, we'd love to connect with you.
