

Lead Frontend Engineer

User Experience, Scalable Interfaces & Modern Web Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of modern financial services, developer platforms, and next-generation digital experiences that enable businesses to operate more efficiently and grow with confidence.

We are seeking an experienced **Lead Frontend Engineer** to drive the development of intuitive, scalable, and high-performing web applications while providing technical leadership across frontend initiatives.

The Opportunity

As a Lead Frontend Engineer, you will combine hands-on development with technical leadership to shape the architecture, quality, and user experience of our products.

You will collaborate closely with Product Managers, Designers, Backend Engineers, and Engineering Leadership to build exceptional user interfaces, establish frontend best practices, and mentor engineers across multiple initiatives.

This role is ideal for someone who is passionate about creating outstanding user experiences while influencing the future direction of frontend engineering.

What You'll Do

Frontend Engineering Leadership

- Lead the design, development, and delivery of scalable frontend applications
- Define frontend architecture standards and engineering best practices
- Guide technical decision-making across frontend projects and initiatives
- Mentor engineers through code reviews, coaching, and knowledge sharing
- Foster a culture of collaboration, innovation, and continuous improvement

Application Development

- Build modern, responsive, and accessible user interfaces
- Develop reusable components and shared frontend libraries
- Collaborate with backend teams to integrate APIs and platform services
- Optimize applications for speed, scalability, and maintainability
- Ensure cross-browser compatibility and seamless user experiences

Architecture & Quality

- Drive adoption of component-driven development methodologies
- Establish testing strategies and quality standards for frontend applications
- Improve performance, monitoring, and observability practices
- Support CI/CD initiatives and streamline frontend deployment workflows
- Evaluate and recommend new technologies that improve development efficiency

Cross-Functional Collaboration

- Partner with Product Managers and Designers to translate requirements into technical solutions
- Participate in roadmap planning, estimation, and sprint execution
- Advocate for user-centric design and accessibility standards
- Communicate technical concepts effectively to technical and non-technical stakeholders
- Align frontend initiatives with broader engineering objectives

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional frontend engineering experience
- 2+ years of experience leading projects or mentoring engineers
- Proven experience delivering large-scale web applications in production environments
- Strong background working within Agile software development teams

Technical Expertise

Strong experience with:

- React
- TypeScript
- Next.js
- JavaScript (ES6+)
- HTML5 and CSS3
- State management libraries
- Component-based architecture
- REST API and GraphQL integrations

Strong understanding of:

- Frontend architecture and design patterns
- Performance optimization techniques
- Accessibility standards (WCAG)
- Responsive and adaptive design principles
- Testing methodologies and quality assurance practices
- CI/CD processes and modern development workflows

Preferred Qualifications

- Experience working in fintech, payments, SaaS, or high-growth technology environments
- Familiarity with modern design systems and component libraries

- Experience with Tailwind CSS, Material UI, or similar frameworks
 - Experience with frontend observability and monitoring tools
 - Experience leading distributed or remote engineering teams
 - Passion for mentoring engineers and building high-performing teams
-

Technology Environment

Frontend Technologies

React • TypeScript • Next.js • JavaScript • HTML5 • CSS3

State Management & Data

Redux • Zustand • React Query • GraphQL

Testing & Quality

Jest • React Testing Library • Cypress • Playwright

UI & Design Systems

Tailwind CSS • Material UI • Storybook • Figma

DevOps & Delivery

GitHub Actions • CI/CD Pipelines • Vercel

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package
- ✨ Opportunity to lead impactful frontend initiatives
- ✨ Exposure to innovative fintech and emerging technology projects

- ✨ Collaborative and engineering-driven culture
 - ✨ Career advancement into Frontend Architecture and Engineering Leadership paths
 - ✨ Strong investment in technical excellence and continuous learning
-

Apply

If you are passionate about building exceptional user experiences, leading frontend engineering initiatives, and mentoring teams to deliver their best work, we'd love to connect with you.
