

Lead Web3 Backend Engineer

Backend Architecture, Blockchain Infrastructure & Technical Leadership

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio companies build blockchain infrastructure, DeFi protocols, digital asset platforms, Web3 APIs, tokenization solutions, and enterprise blockchain applications that are transforming the future of finance and decentralized technology.

We are seeking an experienced **Lead Web3 Backend Engineer** to lead the design, development, and optimization of scalable backend systems powering blockchain applications and decentralized ecosystems.

The Opportunity

As a Lead Web3 Backend Engineer, you will combine hands-on engineering with technical leadership to architect secure, high-performance backend platforms for Web3 applications. You'll collaborate closely with Product Managers, Smart Contract Engineers, Frontend Engineers, DevOps Engineers, Security teams, and Engineering Leadership to build distributed systems that reliably connect traditional backend services with blockchain networks.

This role offers significant ownership over backend architecture, API design, blockchain integrations, and engineering best practices while providing opportunities to mentor engineers and shape the organization's Web3 technology strategy.

What You'll Do

Backend Development

- Design, develop, and maintain scalable backend services for Web3 platforms
- Build secure RESTful APIs, GraphQL services, and microservices supporting decentralized applications
- Develop event-driven systems for processing blockchain transactions and on-chain data
- Write clean, maintainable, and production-ready code with comprehensive testing
- Optimize backend performance, scalability, reliability, and security

Blockchain Infrastructure

- Integrate backend services with Ethereum and EVM-compatible blockchain networks
- Develop services for wallet authentication, transaction management, and blockchain event indexing
- Build systems supporting DeFi protocols, NFTs, staking, governance, DAOs, and tokenized assets
- Implement blockchain data synchronization and indexing solutions
- Optimize gas usage, transaction processing, and blockchain communication

Technical Leadership

- Lead backend architecture discussions and technical design reviews
- Define engineering standards, coding guidelines, and backend best practices
- Mentor Backend and Blockchain Engineers through code reviews and technical coaching
- Drive platform modernization and evaluate emerging Web3 technologies

- Promote engineering excellence, security, and operational reliability

Cloud & Platform Engineering

- Architect cloud-native distributed systems with high availability
- Build CI/CD pipelines and deployment automation for backend services
- Improve observability through monitoring, logging, tracing, and alerting
- Collaborate with DevOps teams to optimize infrastructure performance and scalability
- Implement disaster recovery, redundancy, and fault-tolerant system designs

Cross-Functional Collaboration

- Partner with Product Managers to transform business requirements into scalable backend solutions
 - Work closely with Smart Contract Engineers to integrate blockchain functionality
 - Collaborate with Frontend Engineers to deliver seamless API experiences
 - Coordinate with Security and QA teams to ensure production readiness
 - Participate in sprint planning, technical estimation, and long-term roadmap discussions
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional backend software engineering experience
- 3+ years of hands-on blockchain or Web3 backend development experience
- 2+ years of technical leadership or lead engineering experience
- Proven experience building production-grade distributed backend systems
- Experience working within Agile software development environments

Technical Expertise

Strong experience with:

Backend Development

- Go, Rust, Node.js (NestJS/Express), or Python (FastAPI)
- TypeScript
- REST APIs
- GraphQL
- gRPC

- PostgreSQL
- Redis
- Docker
- Kubernetes
- Git

Blockchain Technologies

- Ethereum
- EVM-compatible networks
- JSON-RPC
- ethers.js or viem (backend integration)
- Smart Contract Integration
- Wallet Authentication
- Blockchain Event Processing
- Web3 APIs

Strong understanding of:

- Microservices Architecture
- Distributed Systems
- Event-Driven Architecture
- Message Queues
- API Security (OAuth2, JWT)
- Blockchain Consensus
- DeFi Protocols
- DAO Governance
- NFT Standards (ERC-721, ERC-1155)
- Token Standards (ERC-20)
- CI/CD and DevOps Practices

Preferred Qualifications

- Experience building DeFi platforms, decentralized exchanges (DEXs), NFT marketplaces, staking infrastructure, DAO governance systems, or tokenization platforms
- Familiarity with Layer 2 ecosystems including Arbitrum, Optimism, Base, Polygon, Avalanche, zkSync, or Solana
- Experience using blockchain infrastructure providers such as Alchemy, Infura, QuickNode, Chainlink, or The Graph

- Experience with Kafka, RabbitMQ, NATS, Apache Pulsar, or other distributed messaging systems
 - Knowledge of Infrastructure as Code using Terraform or Pulumi
 - Contributions to open-source blockchain projects or active participation in the Web3 developer community
-

Technology Environment

Backend Technologies

Go • Rust • Node.js • NestJS • Python • FastAPI • TypeScript

Blockchain Development

Ethereum • Solidity • EVM • JSON-RPC • Hardhat • Foundry • ethers.js • viem

Cloud & Infrastructure

AWS • Azure • Google Cloud Platform • Docker • Kubernetes • Terraform

Databases & Messaging

PostgreSQL • Redis • MongoDB • Kafka • RabbitMQ • NATS

Blockchain Infrastructure

Alchemy • Infura • QuickNode • The Graph • Chainlink

DevOps & Monitoring

GitHub Actions • Prometheus • Grafana • OpenTelemetry • Datadog

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package

✨ Opportunity to lead the development of scalable backend infrastructure for next-generation Web3 platforms

✨ Exposure to blockchain, DeFi, AI, fintech, cloud-native technologies, and emerging digital innovations

✨ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence

✨ Career advancement into Staff Backend Engineer, Principal Engineer, Blockchain Architect, Engineering Manager, Director of Engineering, or CTO

✨ Strong investment in leadership development, blockchain education, open-source contributions, industry conferences, and continuous professional growth

Apply

If you are passionate about building secure, scalable backend systems for decentralized applications, leading engineering teams, and driving the future of Web3 infrastructure, we'd love to connect with you.
