

Lead Web3 Software Engineer

Blockchain Development, Decentralized Systems & Technical Leadership

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio companies develop blockchain infrastructure, decentralized applications (dApps), DeFi protocols, DAO platforms, tokenization solutions, and enterprise Web3 products that are redefining the future of digital finance and ownership.

We are seeking an experienced **Lead Web3 Software Engineer** to lead the architecture, development, and delivery of secure, scalable Web3 platforms while mentoring engineering teams and driving technical innovation.

The Opportunity

As a Lead Web3 Software Engineer, you will combine hands-on engineering with technical leadership to build modern decentralized applications and blockchain-powered platforms. You'll work closely with Product Managers, Blockchain Engineers, Smart Contract Developers, Frontend Engineers, Backend Engineers, DevOps teams, and Engineering Leadership to architect end-to-end Web3 solutions that deliver exceptional performance, security, and user experience.

This role offers significant ownership over application architecture, engineering standards, blockchain integrations, and product delivery while providing opportunities to mentor engineers and influence the organization's long-term Web3 strategy.

What You'll Do

Web3 Software Development

- Design, develop, and maintain scalable Web3 applications and distributed systems
- Build secure backend services, APIs, and frontend integrations for decentralized platforms
- Develop blockchain-enabled applications supporting wallets, tokenization, NFTs, staking, governance, and DeFi
- Write clean, maintainable, and thoroughly tested production-ready code
- Optimize application performance, scalability, and reliability across the technology stack

Blockchain Engineering

- Integrate smart contracts with frontend and backend systems
- Develop secure blockchain transaction workflows and wallet authentication
- Build services that interact with Ethereum and other EVM-compatible networks
- Implement blockchain indexing, event processing, and on-chain/off-chain synchronization
- Optimize blockchain interactions for speed, reliability, and cost efficiency

Technical Leadership

- Lead architecture discussions and technical design reviews
- Define engineering standards, coding practices, and development processes
- Mentor Web3 and Software Engineers through code reviews, technical coaching, and knowledge sharing

- Evaluate emerging blockchain technologies and recommend strategic adoption
- Drive engineering excellence, security, and continuous improvement

Cloud & Platform Engineering

- Design cloud-native, distributed systems supporting decentralized applications
- Build CI/CD pipelines and deployment automation for Web3 platforms
- Improve observability through monitoring, logging, tracing, and performance analysis
- Collaborate with DevOps teams to ensure infrastructure scalability, resilience, and security
- Support high availability and disaster recovery planning

Cross-Functional Collaboration

- Partner with Product Managers to translate business objectives into scalable technical solutions
 - Collaborate with Designers to deliver intuitive decentralized user experiences
 - Work closely with Smart Contract Engineers to integrate blockchain functionality
 - Participate in sprint planning, roadmap discussions, technical estimation, and product strategy
 - Foster a collaborative engineering culture centered on innovation, ownership, and continuous learning
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- 3+ years of hands-on Web3 or blockchain development experience
- 2+ years of technical leadership or lead engineering experience
- Proven experience building production-grade decentralized applications and distributed systems
- Experience working within Agile software development environments

Technical Expertise

Strong experience with:

Programming Languages

- TypeScript
- JavaScript
- Go, Rust, Node.js, or Python

Backend & APIs

- REST APIs
- GraphQL
- PostgreSQL
- Redis
- Docker
- Kubernetes
- Git

Web3 Technologies

- Ethereum
- Solidity (integration experience)
- EVM-compatible blockchains
- ethers.js or viem
- WalletConnect
- MetaMask
- JSON-RPC
- Smart Contract Integration

Strong understanding of:

- Distributed Systems
 - Microservices Architecture
 - Blockchain Consensus
 - DeFi Protocols
 - DAO Governance
 - NFT Standards (ERC-721, ERC-1155)
 - Token Standards (ERC-20)
 - API Security (OAuth2, JWT)
 - Event-Driven Architecture
 - CI/CD and DevOps Practices
 - Secure Software Development
-

Preferred Qualifications

- Experience building DeFi protocols, decentralized exchanges (DEXs), staking platforms, DAO governance systems, NFT marketplaces, or tokenization platforms
 - Familiarity with Layer 2 ecosystems including Arbitrum, Optimism, Base, Polygon, Avalanche, zkSync, Solana, or Cosmos
 - Experience with blockchain infrastructure providers such as Alchemy, Infura, QuickNode, Chainlink, or The Graph
 - Knowledge of Kafka, RabbitMQ, NATS, Terraform, and Infrastructure as Code
 - Experience integrating AI-powered features into blockchain applications
 - Active contributions to open-source blockchain projects or participation in the Web3 developer community
-

Technology Environment

Programming Languages

TypeScript • JavaScript • Go • Rust • Python • Solidity

Frontend

React • Next.js • Tailwind CSS • Wagmi • RainbowKit

Backend

Node.js • NestJS • FastAPI • GraphQL • REST APIs

Blockchain Technologies

Ethereum • EVM • Solidity • Hardhat • Foundry • ethers.js • viem • WalletConnect

Infrastructure & Cloud

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Databases & Messaging

PostgreSQL • Redis • MongoDB • Kafka • RabbitMQ

Blockchain Infrastructure

Alchemy • Infura • QuickNode • The Graph • Chainlink

Monitoring & DevOps

Prometheus • Grafana • OpenTelemetry • Datadog

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead the development of next-generation Web3 platforms and decentralized applications
 - ✦ Exposure to blockchain, DeFi, AI, fintech, and emerging technology initiatives
 - ✦ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence
 - ✦ Career advancement into Staff Engineer, Principal Engineer, Blockchain Architect, Engineering Manager, Director of Engineering, or CTO
 - ✦ Strong investment in leadership development, blockchain research, open-source contributions, industry conferences, and continuous professional development
-

Apply

If you are passionate about building secure, scalable Web3 applications, leading engineering teams, and shaping the future of decentralized technology, we'd love to connect with you.
