

Senior AI Engineer

AI Infrastructure & Intelligent Platform Systems

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, AI infrastructure, digital platforms, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable financial systems, intelligent developer platforms, AI-powered products, and next-generation commerce solutions used by businesses globally.

We are expanding our AI engineering organization and seeking experienced engineers passionate about building scalable machine learning systems, AI infrastructure, and intelligent product experiences.

The Opportunity

We are seeking a Senior AI Engineer to help design, develop, and scale AI-driven systems powering modern fintech and commerce platforms.

In this role, you will work across machine learning infrastructure, large language model integrations, intelligent automation systems, and data-driven applications while collaborating closely with engineering, product, and data teams.

This is a high-impact role offering strong technical ownership, architectural influence, and the opportunity to shape AI-powered platform experiences and infrastructure initiatives.

What You'll Do

AI & Machine Learning Engineering

- Design, develop, and deploy scalable AI and machine learning systems
- Build intelligent applications leveraging LLMs, NLP models, and AI infrastructure
- Develop AI-powered workflows, automation systems, and recommendation engines
- Integrate AI models into production-grade applications and APIs
- Optimize model performance, inference pipelines, and system scalability

Platform & Infrastructure

- Build and maintain ML infrastructure, data pipelines, and model deployment systems
- Support training, evaluation, monitoring, and observability for AI systems
- Improve reliability, scalability, and operational performance of AI services
- Collaborate with DevOps and platform teams on cloud-native AI infrastructure

Collaboration & Leadership

- Work closely with product managers, engineers, and data teams to define AI product initiatives
 - Participate in architecture discussions and technical strategy planning
 - Mentor engineers and contribute to AI engineering best practices
 - Evaluate emerging AI technologies, frameworks, and tooling
-

What We're Looking For

Required Experience

- 5+ years of professional software or AI engineering experience
- Strong experience building machine learning or AI-powered applications
- Experience working with:
 - Python
 - AI/ML frameworks
 - APIs and backend systems
 - cloud infrastructure
 - distributed systems
- Familiarity with large language models (LLMs), NLP systems, or generative AI applications

- Experience deploying and monitoring machine learning models in production environments
 - Strong understanding of:
 - ML pipelines
 - model evaluation and optimization
 - data engineering workflows
 - scalable system architecture
 - AI infrastructure and observability
 - Experience with SQL, databases, and data processing systems
 - Excellent communication and problem-solving skills
-

Preferred Experience

- Experience working on AI infrastructure, intelligent automation, or developer platforms
 - Familiarity with OpenAI APIs, LangChain, vector databases, or RAG systems
 - Experience with AWS, Kubernetes, Docker, or GPU-based infrastructure
 - Experience with recommendation systems, NLP, or predictive analytics
 - Experience working in fintech, SaaS, or infrastructure-focused environments
 - Startup or high-growth engineering environment experience
-

Tech Environment

AI & Machine Learning

Python • PyTorch • TensorFlow • OpenAI APIs • LangChain

Backend & Infrastructure

Node.js • FastAPI • REST APIs • Distributed Systems

Cloud & DevOps

AWS • Docker • Kubernetes • CI/CD

Data & Storage

PostgreSQL • Redis • Vector Databases • Data Pipelines

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact AI engineering ownership
 - ✦ Collaborative and innovation-driven culture
 - ✦ Opportunity to build next-generation AI and fintech platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about artificial intelligence, scalable systems, and building intelligent products that power modern digital platforms, we'd love to connect with you.
