

Senior Full Stack Engineer

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm partnering with innovative companies across fintech, digital infrastructure, and emerging technologies.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, developer platforms, financial infrastructure, and next-generation commerce experiences used by global businesses and modern digital platforms.

We're building a high-caliber engineering team focused on performance, scalability, and product excellence.

The Opportunity

We're looking for a Senior Full Stack Engineer to help design and scale modern fintech and commerce applications across frontend systems, backend services, APIs, and cloud infrastructure.

You'll work closely with engineers, product leaders, and designers to build secure, reliable, and user-focused platforms powering modern payment and financial experiences.

This is a high-impact role with strong ownership, technical influence, and long-term growth potential.

What You'll Do

Engineering & Product Development

- Build scalable full stack applications using modern frontend and backend technologies
- Develop responsive and high-performance user interfaces using React, Next.js, and TypeScript
- Design and maintain APIs, backend services, and cloud-based systems
- Build secure and reliable systems supporting payments, transactions, and financial workflows
- Collaborate cross-functionally with product, design, and engineering teams

Architecture & Scalability

- Contribute to system architecture and technical decision-making
- Optimize performance, scalability, reliability, and maintainability
- Improve engineering workflows, deployment pipelines, and developer experience
- Maintain clean, well-documented, and testable codebases

Leadership

- Participate in code reviews and technical planning
 - Mentor engineers and contribute to engineering best practices
 - Take ownership of features and technical initiatives end-to-end
-

What We're Looking For

Required Experience

- 5+ years of professional full stack engineering experience

- Strong frontend expertise with React, Next.js, TypeScript, and modern JavaScript frameworks
- Backend development experience with Node.js, TypeScript, Python, or similar technologies
- Experience building REST and/or GraphQL APIs
- Strong understanding of databases such as PostgreSQL, MongoDB, MySQL, or Redis
- Experience with cloud platforms, CI/CD pipelines, and modern deployment workflows
- Strong understanding of scalable architecture, performance optimization, and security best practices

Nice to Have

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs and payment systems
 - Experience with AWS, Docker, Kubernetes, or distributed systems
 - Startup or high-growth product experience
 - Experience building dashboards, internal tools, or developer platforms
-

Tech Stack

Frontend

React • Next.js • TypeScript • Tailwind CSS

Backend

Node.js • Python • Express • NestJS

Infrastructure

AWS • Docker • Kubernetes • CI/CD

Database

PostgreSQL • MongoDB • Redis

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation
- ✨ High-impact technical ownership

- ✦ Modern engineering culture and collaborative environment
 - ✦ Opportunity to work on innovative fintech and infrastructure projects
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you enjoy building scalable systems, modern financial platforms, and high-quality product experiences, we'd love to connect with you.
