

Senior Security Engineer

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are expanding our security engineering organization and seeking experienced security professionals passionate about protecting modern platforms, cloud infrastructure, and financial technology systems.

The Opportunity

We are seeking a Senior Security Engineer to help secure modern fintech and commerce platforms across cloud infrastructure, applications, APIs, and internal systems.

In this role, you will work closely with engineering, DevOps, and product teams to strengthen platform security, improve security operations, and establish best practices across infrastructure, application development, and operational processes.

This is a high-impact role offering strong technical ownership, cross-functional collaboration, and the opportunity to shape security strategy across rapidly evolving technology platforms.

What You'll Do

Security Engineering & Operations

- Design, implement, and maintain security controls across applications, infrastructure, and cloud environments
- Identify, assess, and remediate security vulnerabilities across systems and services
- Conduct security reviews, risk assessments, and threat modeling exercises
- Monitor systems for security incidents, suspicious activity, and operational risks
- Support incident response, investigation, and remediation processes

Application & Infrastructure Security

- Improve security practices across APIs, authentication systems, and cloud infrastructure
- Collaborate with engineering teams to integrate security into development workflows and CI/CD pipelines
- Implement infrastructure hardening, access controls, and secrets management
- Support secure software development lifecycle (SSDLC) initiatives
- Conduct penetration testing coordination and security validation activities

Compliance & Best Practices

- Help establish and maintain security policies, standards, and operational procedures
 - Support compliance initiatives related to fintech and infrastructure security requirements
 - Improve security awareness and engineering best practices across teams
 - Maintain security documentation, reporting, and remediation tracking
-

What We're Looking For

Required Experience

- 5+ years of experience in security engineering, application security, or infrastructure security
 - Strong understanding of:
 - cloud security
 - application security
 - network security
 - authentication and authorization systems
 - incident response and vulnerability management
 - Experience securing cloud environments such as AWS, Azure, or GCP
 - Experience with security tools including vulnerability scanners, SIEM platforms, and monitoring systems
 - Familiarity with CI/CD security practices and modern DevSecOps workflows
 - Understanding of APIs, web application security, and secure coding principles
 - Strong scripting or automation skills using Python, Bash, or similar technologies
 - Excellent analytical, troubleshooting, and communication skills
-

Preferred Experience

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or financial systems
 - Experience with Kubernetes, Docker, and container security
 - Knowledge of compliance frameworks such as SOC 2, ISO 27001, or PCI DSS
 - Experience with penetration testing, threat modeling, or red team exercises
 - Startup or high-growth engineering environment experience
-

Tech Environment

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform

Security & Monitoring

SIEM • Vulnerability Management • IAM • Secrets Management

Development & Automation

Python • Bash • CI/CD • GitHub Actions

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact security ownership
 - ✦ Collaborative and engineering-driven culture
 - ✦ Opportunity to secure innovative fintech and infrastructure platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about cybersecurity, infrastructure protection, and securing modern financial technology platforms, we'd love to connect with you.
