

Senior Web3 Founding Engineer

Founding Engineering, Blockchain Innovation & Product Leadership

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Founding Team
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help launch and scale high-growth startups building decentralized applications, digital asset infrastructure, and next-generation financial technologies. Our portfolio companies are redefining industries through Web3 innovation, combining blockchain technology with modern software engineering to create products used by businesses and consumers worldwide.

We are seeking an experienced **Senior Web3 Founding Engineer** to join the founding team of one of our portfolio companies. This is a unique opportunity to build a Web3 product from the ground up, shape its technical vision, and play a critical role in the company's long-term success.

The Opportunity

As a Senior Web3 Founding Engineer, you will be one of the earliest technical hires responsible for defining architecture, building core products, and establishing engineering culture. You'll work directly with founders, product leaders, designers, and investors to transform ambitious ideas into scalable Web3 platforms.

This role combines hands-on engineering, startup ownership, technical leadership, and product thinking. You'll make key architectural decisions, mentor future engineers, and help build a company from its earliest stages through rapid growth.

What You'll Do

Founding Engineering

- Design, architect, and build core Web3 products from concept to production
- Establish engineering standards, development workflows, and technical best practices
- Build MVPs rapidly while maintaining scalability and long-term maintainability
- Make key technology decisions across backend, frontend, blockchain, and infrastructure
- Contribute to product strategy alongside founders and executive leadership

Blockchain & Web3 Development

- Build decentralized applications (dApps) and blockchain-enabled platforms
- Integrate smart contracts with backend services and frontend applications
- Develop infrastructure supporting wallets, tokenization, NFTs, DAOs, DeFi, and digital assets
- Design secure blockchain transaction workflows and on-chain/off-chain integrations
- Evaluate emerging blockchain protocols and Web3 technologies

Full Stack & Platform Development

- Develop scalable backend APIs and distributed services
- Build modern frontend applications using contemporary JavaScript frameworks
- Design cloud-native infrastructure capable of supporting rapid business growth
- Implement CI/CD pipelines, monitoring, logging, and deployment automation
- Optimize performance, scalability, security, and operational reliability

Leadership & Startup Growth

- Partner closely with founders on product roadmap and technical strategy
 - Mentor future engineering hires and help build a world-class engineering organization
 - Participate in technical recruiting and interview processes
 - Drive engineering culture centered on ownership, innovation, and execution
 - Represent engineering in investor, customer, and strategic partner discussions when appropriate
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- 3+ years building Web3, blockchain, or decentralized applications
- Experience working at startups or early-stage technology companies
- Proven ability to build products from concept through production
- Strong understanding of startup execution, product development, and rapid iteration

Technical Expertise

Strong experience with:

- TypeScript or JavaScript
- Go, Rust, Node.js, or Python
- React or Next.js
- Solidity
- PostgreSQL
- Redis
- Docker
- Git

Strong experience with Web3 technologies:

- Ethereum
- EVM ecosystems
- Smart Contracts
- ethers.js or viem
- Wallet integrations
- JSON-RPC
- Token standards (ERC-20, ERC-721, ERC-1155)
- Blockchain infrastructure

Strong understanding of:

- Distributed systems
 - Cloud-native architecture
 - API design
 - Cryptography fundamentals
 - DeFi and DAO ecosystems
 - Blockchain security best practices
 - CI/CD pipelines
 - Agile product development
-

Preferred Qualifications

- Experience building DeFi protocols, Layer 2 solutions, DAOs, NFT marketplaces, or tokenization platforms
 - Experience with Rust, Solana, Cosmos SDK, Substrate, or Move-based blockchain ecosystems
 - Familiarity with AI-powered Web3 products or decentralized identity solutions
 - Experience deploying applications on AWS, Google Cloud Platform, or Azure
 - Previous experience as a founding engineer or early employee at a startup
 - Contributions to open-source blockchain projects or active participation in the Web3 ecosystem
-

Technology Environment

Programming Languages

TypeScript • Rust • Go • Python • Solidity

Frontend

React • Next.js • Tailwind CSS • Wagmi • RainbowKit

Backend

Node.js • FastAPI • NestJS • GraphQL • REST APIs

Blockchain Technologies

Ethereum • EVM • Solidity • Hardhat • Foundry • viem • ethers.js • The Graph

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Databases & Messaging

PostgreSQL • Redis • MongoDB • Kafka • RabbitMQ

Observability & DevOps

Prometheus • Grafana • OpenTelemetry • Datadog

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
 - ✨ Full-time and part-time opportunities
 - ✨ Competitive compensation package with potential equity participation
 - ✨ Opportunity to join a founding team and shape a product from day one
 - ✨ Build cutting-edge Web3, blockchain, AI, and fintech solutions with real-world impact
 - ✨ High ownership, autonomy, and influence over technical and product direction
 - ✨ Collaborative, startup-driven culture focused on innovation, execution, and continuous learning
 - ✨ Career growth into Founding CTO, Head of Engineering, Principal Engineer, or Engineering Director
 - ✨ Strong investment in professional development, open-source contributions, industry events, and emerging technologies
-

Apply

If you're passionate about building category-defining Web3 products, thrive in fast-paced startup environments, and want to help shape the future of decentralized technology as a founding engineer, we'd love to connect with you.
