

Blockchain Architect

Web3 Infrastructure & Digital Asset Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior / Architect Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, blockchain, digital infrastructure, and emerging technology sectors.

We collaborate on projects involving modern financial systems, decentralized technologies, digital asset platforms, and next-generation commerce infrastructure. Our teams work closely with high-growth ventures building scalable blockchain ecosystems, Web3 applications, and developer-focused platforms.

We are expanding our blockchain engineering organization and seeking a highly experienced Blockchain Architect to help design and scale secure, high-performance decentralized systems.

The Opportunity

We are looking for a Blockchain Architect to lead the architecture and technical strategy for blockchain infrastructure, smart contract systems, and Web3 platform integrations.

In this role, you will define scalable blockchain solutions, guide engineering decisions, and collaborate closely with backend, frontend, DevOps, and product teams to build secure and reliable decentralized applications and digital asset platforms.

This is a high-impact leadership role offering strong ownership, architectural influence, and the opportunity to shape next-generation Web3 infrastructure.

What You'll Do

Blockchain Architecture & Development

- Design and architect scalable blockchain and Web3 systems
- Define smart contract architecture, transaction workflows, and decentralized infrastructure
- Lead the design of secure on-chain and off-chain integrations
- Architect wallet connectivity, identity systems, and blockchain interaction layers
- Develop technical strategies for scalability, interoperability, and platform reliability

Infrastructure & Security

- Design secure blockchain infrastructure and transaction systems
- Establish security best practices for smart contracts, wallet interactions, and asset management
- Optimize blockchain performance, transaction efficiency, and system scalability
- Collaborate with DevOps teams on cloud infrastructure, node operations, and deployment pipelines

Leadership & Collaboration

- Provide technical leadership across blockchain engineering initiatives
 - Mentor engineers and guide architecture decisions and engineering standards
 - Collaborate cross-functionally with product, engineering, and business stakeholders
 - Evaluate emerging blockchain technologies, frameworks, and ecosystem opportunities
-

What We're Looking For

Required Experience

- 7+ years of software engineering experience with significant blockchain architecture experience
 - Strong expertise in blockchain protocols, smart contracts, and decentralized systems
 - Experience building and deploying applications on Ethereum or EVM-compatible chains
 - Strong proficiency with Solidity and Web3 development frameworks
 - Experience designing secure smart contract architectures and transaction systems
 - Deep understanding of:
 - blockchain consensus mechanisms
 - wallet infrastructure
 - cryptography fundamentals
 - token standards (ERC-20, ERC-721, ERC-1155)
 - decentralized application architecture
 - Experience with backend systems, APIs, and distributed infrastructure
 - Familiarity with cloud platforms, CI/CD pipelines, and containerized environments
 - Strong communication, leadership, and problem-solving skills
-

Preferred Experience

- Experience with Layer 2 solutions, cross-chain infrastructure, or interoperability protocols
 - Familiarity with staking systems, DeFi protocols, or digital asset platforms
 - Experience with Node.js, TypeScript, Go, Rust, or Python
 - Experience with blockchain indexing, analytics, or event processing systems
 - Knowledge of security auditing practices and smart contract testing frameworks
 - Startup or high-growth Web3 product experience
-

Tech Stack

Blockchain

Solidity • Ethereum • EVM • Hardhat • Foundry • ethers.js

Backend & Infrastructure

Node.js • TypeScript • Go • Python • REST APIs • GraphQL

Cloud & DevOps

AWS • Docker • Kubernetes • CI/CD

Database & Messaging

PostgreSQL • Redis • Kafka

Tools & Collaboration

Git • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact leadership role with strong technical ownership
 - ✦ Opportunity to shape modern blockchain and digital asset infrastructure
 - ✦ Collaborative engineering culture and fast-moving environment
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about decentralized technologies, blockchain infrastructure, and building scalable Web3 systems, we'd love to connect with you.
