

Senior Blockchain Analyst

Digital Assets, Web3 Research & Blockchain Intelligence

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, blockchain, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help identify opportunities within digital assets, decentralized technologies, and next-generation financial ecosystems. Our teams work closely with founders, operators, and industry stakeholders to evaluate emerging technologies and support long-term value creation.

We are seeking a Senior Blockchain Analyst to help drive blockchain research, ecosystem analysis, and investment intelligence across the rapidly evolving Web3 landscape.

The Opportunity

As a Senior Blockchain Analyst, you will play a critical role in evaluating blockchain networks, decentralized applications, digital asset ecosystems, and emerging industry trends.

You will conduct in-depth research and analysis to support strategic decision-making, investment evaluations, market intelligence initiatives, and ecosystem monitoring activities.

This role is ideal for individuals who combine strong analytical capabilities with a deep understanding of blockchain technology and digital asset markets.

What You'll Do

Blockchain Research & Analysis

- Conduct comprehensive research on blockchain protocols, Web3 ecosystems, and digital asset projects
- Analyze emerging trends across DeFi, Layer 1 and Layer 2 networks, tokenization, stablecoins, and decentralized infrastructure
- Monitor ecosystem developments, governance proposals, and technological advancements
- Evaluate project fundamentals, adoption metrics, and ecosystem growth indicators
- Produce detailed reports, presentations, and market intelligence summaries

Investment & Strategic Analysis

- Support due diligence activities for blockchain-related initiatives and opportunities
- Assess token economics, business models, and long-term sustainability of blockchain projects
- Identify market opportunities, competitive dynamics, and potential risks
- Develop investment theses supported by quantitative and qualitative analysis
- Present findings and recommendations to internal stakeholders

Data & On-Chain Intelligence

- Analyze blockchain data and on-chain activity to identify trends and behavioral insights
- Monitor network usage, transaction volumes, wallet activity, and protocol performance
- Utilize blockchain analytics platforms to generate actionable intelligence
- Build dashboards and reporting frameworks for ongoing ecosystem tracking
- Support research initiatives using both public and proprietary data sources

Cross-Functional Collaboration

- Partner with investment professionals, technical teams, and external stakeholders
- Translate complex blockchain concepts into clear business insights
- Contribute to strategic planning and market outlook discussions

- Represent analytical perspectives during project evaluations and review processes
-

What We're Looking For

Required Qualifications

Experience

- 4+ years of experience in blockchain research, digital asset analysis, investment analysis, or related fields
- Demonstrated understanding of blockchain ecosystems and emerging Web3 technologies
- Experience conducting market research and presenting analytical findings to stakeholders
- Strong written communication and report-writing abilities

Technical & Analytical Expertise

Strong understanding of:

- Blockchain architecture and consensus mechanisms
- Digital asset ecosystems and token models
- Decentralized finance (DeFi) protocols
- Smart contracts and blockchain applications
- On-chain analytics methodologies
- Cryptocurrency market dynamics and industry trends
- Risk assessment and opportunity evaluation

Research & Data Skills

- Experience utilizing blockchain analytics platforms and market intelligence tools
 - Ability to synthesize large amounts of information into actionable insights
 - Strong quantitative and qualitative analytical skills
 - Advanced proficiency with spreadsheets, dashboards, and data visualization tools
 - Detail-oriented approach with strong organizational capabilities
-

Preferred Qualifications

- Experience within investment management, venture capital, hedge funds, or research organizations
 - Familiarity with Ethereum and EVM-based ecosystems
 - Experience using blockchain analytics tools such as Dune Analytics, Nansen, Glassnode, Arkham, or Messari
 - Understanding of token economics, governance frameworks, and incentive mechanisms
 - Experience evaluating early-stage blockchain ventures and protocols
 - Professional certifications or advanced education in finance, economics, technology, or related disciplines
-

Technology & Research Environment

Blockchain Ecosystems

Ethereum • Layer 2 Networks • DeFi Protocols • Web3 Infrastructure

Analytics & Intelligence Tools

Dune Analytics • Nansen • Glassnode • Messari • Arkham

Research & Reporting

Excel • Google Sheets • Data Visualization Platforms • Presentation Tools

Collaboration

Notion • Slack • Jira • Google Workspace

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package

- ✨ Opportunity to work at the intersection of finance and emerging technologies
 - ✨ Exposure to innovative blockchain and digital asset initiatives
 - ✨ Collaborative, research-driven environment
 - ✨ Career growth within investment and technology sectors
 - ✨ Meaningful impact on strategic decision-making and market intelligence efforts
-
