

Senior Ruby on Rails Software Engineer

Backend Platforms, Financial Technology & Scalable Web Applications

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of modern financial services, developer platforms, and scalable software solutions that power businesses worldwide.

We are seeking an experienced **Senior Ruby on Rails Software Engineer** to help design, build, and scale mission-critical applications supporting innovative products across our portfolio ecosystem.

The Opportunity

As a Senior Ruby on Rails Software Engineer, you will play a key role in developing robust backend systems, scalable APIs, and high-performance web applications that support business-critical operations.

You will work closely with Product Managers, Designers, Frontend Engineers, and Infrastructure teams to deliver secure, reliable, and maintainable software solutions while contributing to architectural decisions and engineering best practices.

This role offers significant ownership, technical influence, and opportunities to help shape the future of our technology initiatives.

What You'll Do

Backend Application Development

- Design, develop, and maintain scalable web applications using Ruby on Rails
- Build and enhance backend services, APIs, and platform integrations
- Develop reusable, maintainable, and well-tested software components
- Collaborate with frontend engineers to deliver seamless user experiences
- Integrate third-party platforms, payment services, and business systems

Architecture & Platform Engineering

- Contribute to system architecture and application design decisions
- Design scalable solutions that support growth, reliability, and performance
- Optimize database structures, queries, and application performance
- Improve application monitoring, observability, and operational efficiency
- Support cloud-native infrastructure and deployment initiatives

Quality & Engineering Excellence

- Write clean, maintainable, and thoroughly tested code
- Participate in code reviews and architectural discussions
- Identify and resolve performance bottlenecks and technical debt
- Champion engineering best practices and software quality standards
- Contribute to CI/CD pipelines and automated deployment workflows

Collaboration & Mentorship

- Partner with Product, Design, QA, and Engineering teams throughout the development lifecycle
 - Mentor junior and mid-level engineers through technical guidance and code reviews
 - Participate in sprint planning, estimation, and technical roadmapping
 - Support cross-functional initiatives and strategic technology projects
 - Foster a collaborative and continuous learning environment
-

What We're Looking For

Required Qualifications

Experience

- 5+ years of professional software engineering experience
- 4+ years of hands-on Ruby on Rails development experience
- Proven experience building and maintaining production-grade web applications
- Experience working in Agile software development environments

Technical Expertise

Strong experience with:

- Ruby
- Ruby on Rails
- RESTful API development
- PostgreSQL or MySQL
- Background job processing systems
- Caching strategies and performance optimization
- Automated testing frameworks
- Git-based development workflows

Strong understanding of:

- Object-oriented design principles
- MVC architecture
- Database design and optimization
- Web application security best practices
- Scalable backend system design
- CI/CD and deployment automation
- Cloud-based application environments

Preferred Qualifications

- Experience working in fintech, payments, SaaS, or high-growth technology environments
 - Familiarity with financial systems, transaction processing, or payment platforms
 - Experience with Sidekiq, Redis, and background processing architectures
 - Experience with GraphQL and modern API architectures
 - Experience with AWS and cloud-native infrastructure
 - Experience mentoring engineers and leading technical initiatives
-

Technology Environment

Backend Development

Ruby • Ruby on Rails • REST APIs • GraphQL

Databases & Caching

PostgreSQL • MySQL • Redis

Background Processing

Sidekiq • Active Job

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform

Testing & Quality

RSpec • Capybara • CI/CD Pipelines

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to build and scale impactful software products
 - ✦ Exposure to innovative fintech and emerging technology initiatives
 - ✦ Collaborative and engineering-driven culture
 - ✦ Career advancement and technical leadership opportunities
 - ✦ Strong investment in learning, ownership, and continuous improvement
-

Apply

If you are passionate about Ruby on Rails development, building scalable software systems, and solving complex engineering challenges, we'd love to connect with you.
