About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are growing our engineering organization and seeking experienced software engineers passionate about building reliable, scalable, and high-performance systems.

The Opportunity

We are looking for a Senior Software Engineer to help architect, develop, and scale modern applications and infrastructure powering fintech and commerce platforms.

You will work across backend systems, APIs, cloud infrastructure, and platform services while collaborating closely with product, frontend, and engineering teams to deliver secure and scalable technology solutions.

This role offers strong technical ownership, architectural influence, and the opportunity to contribute directly to high-impact infrastructure projects.

What You'll Do

Software Development

- Design, build, and maintain scalable software systems and backend services
- Develop APIs, platform infrastructure, and internal tools supporting fintech and commerce applications
- Write clean, maintainable, and high-quality production code
- Collaborate with frontend engineers and product teams to deliver end-to-end features

Architecture & Scalability

- Contribute to system architecture and technical strategy
- Improve application performance, scalability, reliability, and security
- Design distributed systems and cloud-native solutions
- Maintain engineering standards, testing practices, and development workflows

Collaboration & Leadership

- Participate in code reviews, technical planning, and engineering discussions
 - Mentor engineers and support team growth
 - Take ownership of technical initiatives from design through deployment
 - Collaborate cross-functionally with product, design, and infrastructure teams
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience

- Strong proficiency in backend development using Node.js, TypeScript, Python, Go, Java, or similar technologies
- Experience building scalable APIs and distributed systems
- Strong understanding of databases such as PostgreSQL, MySQL, MongoDB, or Redis
- Experience with cloud infrastructure and modern deployment environments
- Familiarity with CI/CD pipelines, Git workflows, and containerized applications
- Strong understanding of system design, scalability, security, and performance optimization
- Excellent problem-solving and communication skills

Nice to Have

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs and payment systems
 - Experience with AWS, Docker, Kubernetes, or microservices architecture
 - Experience building internal tools, developer platforms, or transaction systems
 - Startup or high-growth product experience
-

Tech Stack

Backend

Node.js • TypeScript • Python • Go • Java

Infrastructure

AWS • Docker • Kubernetes • CI/CD

Database

PostgreSQL • MongoDB • Redis • MySQL

Tools & Collaboration

Git • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation
- ✨ High-impact technical ownership

- ✦ Modern engineering culture and collaborative environment
 - ✦ Opportunity to work on innovative fintech and infrastructure projects
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you enjoy solving complex engineering challenges and building scalable systems powering modern financial technology, we'd love to connect with you.
