

Senior Staff Software Engineer

Technical Leadership, Software Architecture & Enterprise Engineering Excellence

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Staff Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across AI, blockchain, fintech, digital infrastructure, cybersecurity, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of innovative businesses building scalable cloud platforms, enterprise software, decentralized systems, and intelligent digital products. Our portfolio companies develop technologies that power mission-critical applications across global industries.

We are seeking an experienced **Senior Staff Software Engineer** to provide technical leadership across engineering organizations, architect highly scalable systems, mentor senior engineers, and drive the long-term technical vision for our software platforms.

The Opportunity

As a Senior Staff Software Engineer, you will serve as one of the organization's highest-level individual contributors, leading the design of large-scale distributed systems while influencing engineering strategy across multiple teams. You will collaborate closely with Engineering Managers, Architects, Product Managers, Principal Engineers, DevOps, Security, and Executive Leadership to solve complex technical challenges and deliver reliable, secure, and scalable software solutions.

This role combines deep hands-on engineering expertise with cross-functional technical leadership and organizational influence, making a significant impact on the company's technology direction.

What You'll Do

Software Architecture & System Design

- Architect scalable, resilient, and secure enterprise software platforms
- Lead the design of distributed systems, cloud-native applications, and microservices architectures
- Establish architectural standards, engineering principles, and technical governance
- Evaluate new technologies and recommend long-term platform improvements
- Drive modernization initiatives across multiple engineering organizations

Technical Leadership

- Serve as a trusted technical advisor across engineering teams
- Lead architecture reviews, design discussions, and technical decision-making
- Mentor Staff, Senior, and Mid-Level Engineers through coaching and code reviews
- Guide engineering teams in solving complex technical challenges
- Foster a culture of technical excellence, innovation, and continuous learning

Software Development

- Write high-quality, maintainable, and production-ready code for mission-critical systems
- Build scalable backend services, APIs, and distributed applications
- Optimize application performance, scalability, reliability, and security
- Resolve complex production issues and technical bottlenecks
- Improve software quality through testing, automation, and engineering best practices

Platform & Cloud Engineering

- Design cloud-native infrastructure supporting global-scale applications
- Improve CI/CD pipelines, deployment automation, and Infrastructure as Code
- Enhance observability through monitoring, logging, tracing, and performance analytics
- Collaborate with Platform, DevOps, and Security teams to improve operational excellence
- Drive platform reliability, resiliency, and disaster recovery planning

Strategic Collaboration

- Partner with Product Management to align technical strategy with business goals
 - Collaborate with Executive Leadership on long-term technology roadmaps
 - Support technical due diligence for new products and strategic initiatives
 - Influence engineering standards across multiple teams and business units
 - Contribute to hiring, technical interviews, succession planning, and engineering leadership development
-

What We're Looking For

Required Qualifications

Experience

- 10+ years of professional software engineering experience
- 5+ years leading architecture and technical strategy across multiple engineering teams
- Proven experience designing and delivering enterprise-scale distributed systems
- Demonstrated success mentoring senior engineers and driving engineering excellence
- Strong experience working in Agile software development environments

Technical Expertise

Strong experience with:

- Java, Go, Python, Rust, C#, or TypeScript
- REST APIs and GraphQL
- Microservices Architecture
- Distributed Systems
- SQL and NoSQL Databases
- Docker
- Kubernetes

- Git

Strong understanding of:

- Software Architecture Patterns
 - Domain-Driven Design (DDD)
 - Event-Driven Architecture
 - Cloud-Native Development
 - API Design and Security
 - CI/CD Pipelines
 - Infrastructure as Code (Terraform or Pulumi)
 - Performance Optimization
 - Secure Software Development
 - DevOps and Site Reliability Engineering (SRE)
-

Preferred Qualifications

- Experience building enterprise SaaS platforms, fintech applications, AI systems, blockchain infrastructure, or cloud-native platforms
 - Experience with AWS, Microsoft Azure, or Google Cloud Platform
 - Familiarity with Kafka, RabbitMQ, Apache Pulsar, or other event-streaming platforms
 - Knowledge of observability platforms such as Prometheus, Grafana, Datadog, OpenTelemetry, or New Relic
 - Experience contributing to open-source software or leading large-scale technical initiatives
 - Experience participating in executive technology planning and engineering organizational design
-

Technology Environment

Programming Languages

Java • Go • Python • Rust • TypeScript • C#

Architecture & Backend

Microservices • Domain-Driven Design • REST APIs • GraphQL • gRPC • Event-Driven Systems

Cloud & Infrastructure

AWS • Microsoft Azure • Google Cloud Platform • Docker • Kubernetes • Terraform • Pulumi

Databases & Messaging

PostgreSQL • MySQL • MongoDB • Redis • Kafka • RabbitMQ • Apache Pulsar

DevOps & Observability

GitHub Actions • Jenkins • Prometheus • Grafana • OpenTelemetry • Datadog • New Relic

Tools & Collaboration

GitHub • Jira • Confluence • Slack • Notion • Figma

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
 - ✨ Full-time and part-time opportunities
 - ✨ Competitive compensation package
 - ✨ Opportunity to define the technical direction of enterprise-scale software platforms
 - ✨ Exposure to AI, blockchain, fintech, cloud-native technologies, and emerging digital innovations
 - ✨ Collaborative, engineering-first culture focused on innovation, technical excellence, and continuous improvement
 - ✨ Career advancement into Principal Engineer, Distinguished Engineer, Chief Architect, VP of Engineering, or CTO
 - ✨ Strong investment in technical leadership development, professional certifications, conference participation, open-source contributions, and continuous learning
-

Apply

If you are passionate about solving complex engineering challenges, architecting scalable software systems, mentoring world-class engineering teams, and shaping the future of modern technology platforms, we'd love to connect with you.
