

Lead Android Engineer

Mobile Platforms, Engineering Leadership & Scalable Digital Experiences

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of modern financial services, payment technologies, developer platforms, and next-generation digital experiences used by businesses worldwide.

We are seeking an experienced **Lead Android Engineer** to drive the architecture, development, and delivery of world-class Android applications while providing technical leadership across mobile engineering initiatives.

The Opportunity

As a Lead Android Engineer, you will combine hands-on Android development with technical leadership, helping shape mobile strategy, engineering standards, and product delivery across multiple initiatives.

You will collaborate closely with Product Managers, Designers, Backend Engineers, QA teams, and Engineering Leadership to build scalable, secure, and high-performing Android applications that deliver exceptional user experiences.

This role is ideal for an experienced Android engineer who enjoys mentoring teams, solving complex technical challenges, and leading impactful mobile projects.

What You'll Do

Android Engineering Leadership

- Lead the design, development, and deployment of Android applications
- Drive technical decision-making and establish Android engineering best practices
- Mentor and support Android engineers through code reviews, technical coaching, and knowledge sharing
- Promote engineering excellence, innovation, and continuous improvement
- Help define and execute the long-term Android technology roadmap

Mobile Application Development

- Build scalable, reliable, and user-centric Android applications
- Design and implement new features, enhancements, and platform capabilities
- Develop reusable components and maintainable codebases
- Collaborate with backend teams to integrate APIs and platform services
- Ensure applications meet performance, security, and usability standards

Architecture & Quality

- Define Android architecture patterns and development standards
- Optimize application performance, responsiveness, and reliability
- Implement automated testing and quality assurance practices
- Improve release processes, CI/CD pipelines, and deployment workflows
- Monitor production systems and proactively resolve technical issues

Cross-Functional Collaboration

- Partner with Product, Design, QA, and Infrastructure teams to deliver successful outcomes
 - Translate business requirements into scalable technical solutions
 - Participate in roadmap planning, technical estimation, and sprint execution
 - Communicate technical decisions and architectural concepts effectively
 - Align Android initiatives with broader engineering objectives
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional Android development experience
- 2+ years of experience leading mobile projects or mentoring engineers
- Proven experience delivering production-grade Android applications at scale
- Strong background working in Agile software development environments

Technical Expertise

Strong experience with:

- Kotlin
- Android SDK
- Jetpack Compose
- Android Jetpack Libraries
- Coroutines and Flow
- RESTful API integrations
- Dependency Injection frameworks
- Mobile testing frameworks

Strong understanding of:

- MVVM and Clean Architecture
- Android application lifecycle
- Performance optimization and memory management
- Mobile security best practices
- Accessibility and responsive UI development
- CI/CD pipelines and release automation
- Google Play Store deployment processes

Preferred Qualifications

- Experience working in fintech, payments, e-commerce, or SaaS environments
 - Familiarity with payment experiences and financial technology products
 - Experience with Firebase, GraphQL, and modern mobile analytics platforms
 - Experience leading distributed or remote engineering teams
 - Experience building applications used by large-scale customer bases
 - Passion for mentoring engineers and building high-performing teams
-

Technology Environment

Android Development

Kotlin • Android SDK • Jetpack Compose • Coroutines • Flow

Architecture & Libraries

MVVM • MVI • Clean Architecture • Hilt • Retrofit

Testing & Quality

JUnit • Espresso • MockK • UI Testing

Backend & Integrations

REST APIs • GraphQL • Firebase

DevOps & Delivery

GitHub Actions • Fastlane • CI/CD Pipelines

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead impactful Android initiatives
 - ✦ Exposure to innovative fintech and emerging technology projects
 - ✦ Collaborative and engineering-driven culture
 - ✦ Career advancement into Mobile Architect, Staff Engineer, and Engineering Management paths
 - ✦ Strong investment in technical excellence and continuous learning
-

Apply

If you are passionate about Android development, mobile architecture, and leading engineering teams to build exceptional digital experiences, we'd love to connect with you.
