

Lead Mobile Software Engineer

Mobile Platforms & Digital Experience Engineering

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of modern financial services, payment technologies, developer platforms, and next-generation digital experiences used by businesses worldwide.

We are seeking an experienced **Lead Mobile Software Engineer** to lead the design, development, and delivery of high-quality mobile applications that support innovative products across our portfolio ecosystem.

The Opportunity

As a Lead Mobile Software Engineer, you will combine hands-on mobile development with technical leadership, helping guide engineering teams through complex challenges while delivering exceptional mobile experiences across iOS and Android platforms.

You will work closely with Product Managers, Designers, Backend Engineers, and Engineering Leadership to define technical direction, establish development standards, and mentor engineers throughout the software development lifecycle.

This role is ideal for an experienced mobile engineer who enjoys building products, leading teams, and driving technical excellence.

What You'll Do

Mobile Engineering Leadership

- Lead the architecture, development, and delivery of mobile applications across iOS and Android platforms
- Drive technical decision-making and establish best practices for mobile development
- Mentor and support mobile engineers through code reviews, coaching, and knowledge sharing
- Foster a culture of collaboration, innovation, and continuous improvement
- Help shape the long-term mobile technology roadmap

Mobile Application Development

- Design and implement scalable, secure, and high-performing mobile solutions
- Build new features and enhance existing mobile experiences
- Develop reusable components and maintainable codebases
- Collaborate closely with backend teams to integrate APIs and platform services
- Ensure applications meet quality, accessibility, and usability standards

Architecture & Quality

- Define mobile architecture standards and development guidelines
- Optimize application performance, responsiveness, and reliability
- Establish testing strategies and improve release confidence
- Support CI/CD initiatives and streamline mobile deployment processes
- Monitor application health and address production issues proactively

Cross-Functional Collaboration

- Partner with Product, Design, QA, and Infrastructure teams to deliver successful outcomes
 - Translate business requirements into scalable technical solutions
 - Participate in roadmap planning, estimation, and sprint execution
 - Communicate technical decisions effectively to both technical and non-technical stakeholders
 - Drive alignment across distributed engineering teams
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional mobile software engineering experience
- 2+ years of experience leading mobile projects or mentoring engineering teams
- Proven experience delivering production-grade mobile applications
- Strong background working within Agile software development environments

Technical Expertise

Strong experience with:

- Swift and SwiftUI for iOS development
- Kotlin and Android SDK for Android development
- Cross-platform frameworks such as Flutter or React Native
- Mobile architecture patterns (MVVM, MVI, Clean Architecture)
- RESTful APIs and backend integrations
- Mobile testing frameworks and release management processes
- App Store and Google Play deployment workflows

Strong understanding of:

- Mobile performance optimization
 - Application security best practices
 - Accessibility and responsive design principles
 - CI/CD pipelines for mobile applications
 - Scalable mobile engineering practices
-

Preferred Qualifications

- Experience working in fintech, payments, e-commerce, or SaaS environments
 - Familiarity with mobile payment experiences and financial technology products
 - Experience leading distributed or remote engineering teams
 - Experience implementing mobile analytics, push notifications, and third-party SDK integrations
 - Experience building applications used by large-scale customer bases
 - Passion for mentoring engineers and cultivating strong engineering cultures
-

Technology Environment

Mobile Platforms

Swift • SwiftUI • Kotlin • Android SDK

Cross-Platform Technologies

Flutter • React Native

Architecture & Quality

MVVM • MVI • Clean Architecture • XCTest • Espresso

Backend & Integrations

REST APIs • GraphQL • Firebase

DevOps & Delivery

Fastlane • GitHub Actions • CI/CD Pipelines

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to lead impactful mobile initiatives
 - ✦ Exposure to innovative fintech and emerging technology projects
 - ✦ Collaborative and engineering-driven culture
 - ✦ Career advancement into Mobile Architect and Engineering Management paths
 - ✦ Strong investment in technical excellence and continuous learning
-

Apply

If you are passionate about mobile engineering, leading high-performing teams, and building exceptional digital experiences that make a meaningful impact, we'd love to connect with you.
