

Senior .NET Software Engineer

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are growing our engineering team and looking for experienced .NET engineers passionate about building secure, scalable, and high-performance enterprise applications.

The Opportunity

We are seeking a Senior .NET Software Engineer to help architect, develop, and scale modern backend systems and platform services powering fintech and commerce applications.

You will work closely with product managers, frontend engineers, DevOps teams, and other stakeholders to build reliable APIs, distributed services, and cloud-native applications that support mission-critical financial systems.

This role offers strong technical ownership, architectural influence, and the opportunity to contribute directly to modern infrastructure and platform initiatives.

What You'll Do

Software Development

- Design, develop, and maintain scalable backend applications using .NET and C#
- Build secure APIs, microservices, and platform infrastructure supporting payment and financial workflows
- Develop clean, maintainable, and production-ready code
- Integrate backend systems with databases, third-party services, and cloud infrastructure
- Collaborate with frontend engineers and product teams to deliver end-to-end solutions

Architecture & Scalability

- Contribute to system architecture and technical strategy
- Optimize application performance, reliability, scalability, and security
- Improve development workflows, deployment pipelines, and engineering standards
- Support cloud-native and distributed system design initiatives

Collaboration & Leadership

- Participate in code reviews, technical discussions, and architecture planning
 - Mentor engineers and contribute to engineering best practices
 - Take ownership of features and technical projects from development through deployment
 - Collaborate cross-functionally with engineering, product, and infrastructure teams
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience

- Strong expertise in C#, .NET, and ASP.NET Core
- Experience building RESTful APIs and backend services
- Strong understanding of software architecture, object-oriented design, and distributed systems
- Experience with SQL Server, PostgreSQL, MySQL, or other relational databases
- Familiarity with cloud platforms such as AWS, Azure, or GCP
- Experience with Docker, CI/CD pipelines, and modern deployment workflows
- Strong understanding of application security, scalability, and performance optimization
- Excellent problem-solving and communication skills

Nice to Have

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or financial systems
 - Experience with microservices and event-driven architecture
 - Experience with Kubernetes and container orchestration
 - Startup or high-growth product experience
-

Tech Stack

Backend

C# • .NET • ASP.NET Core • Entity Framework

Infrastructure

AWS • Azure • Docker • Kubernetes • CI/CD

Database

SQL Server • PostgreSQL • Redis • MySQL

Tools & Collaboration

Git • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation
- ✨ High-impact technical ownership

- ✦ Modern engineering culture and collaborative environment
 - ✦ Opportunity to work on innovative fintech and infrastructure projects
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about building scalable backend systems and modern financial technology platforms, we'd love to connect with you.
