

Senior Software Engineer (Python)

Fintech Infrastructure & Commerce Platforms

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management and technology-focused firm supporting innovative companies across fintech, digital infrastructure, and emerging technology sectors.

We collaborate on projects connected to Stripe's ecosystem, helping build scalable payment systems, financial infrastructure, developer-focused platforms, and modern commerce solutions used by businesses globally.

We are expanding our engineering organization and seeking experienced Python engineers passionate about building scalable backend systems, intelligent infrastructure, and high-performance platform services.

The Opportunity

We are seeking a Senior Software Engineer (Python) to help architect, develop, and scale backend systems powering fintech and commerce platforms.

In this role, you will work closely with engineering, infrastructure, and product teams to build secure APIs, distributed systems, automation services, and cloud-native applications supporting modern financial technology products.

This is a high-impact engineering role offering strong technical ownership, architectural influence, and the opportunity to contribute directly to scalable infrastructure initiatives.

What You'll Do

Backend & Platform Development

- Design, develop, and maintain scalable backend systems using Python
- Build secure APIs, microservices, and platform infrastructure supporting fintech and commerce applications
- Develop clean, maintainable, and production-ready code
- Collaborate with frontend, DevOps, and product teams to deliver end-to-end solutions
- Build automation workflows, internal tools, and high-performance backend services

Architecture & Scalability

- Contribute to system architecture and technical strategy
- Improve application performance, scalability, reliability, and maintainability
- Participate in architecture reviews, technical planning, and engineering discussions
- Support cloud-native and distributed system initiatives
- Help establish engineering standards, testing practices, and operational workflows

Collaboration & Leadership

- Participate in code reviews and mentorship across engineering teams
 - Take ownership of technical projects from development through deployment
 - Collaborate cross-functionally with engineering, infrastructure, and product stakeholders
 - Contribute to long-term platform and engineering improvements
-

What We're Looking For

Required Experience

- 5+ years of professional software engineering experience
 - Strong expertise in Python and backend application development
 - Experience building RESTful APIs and scalable backend services
 - Familiarity with frameworks such as FastAPI, Django, Flask, or similar technologies
 - Strong understanding of:
 - scalable backend architecture
 - distributed systems and microservices
 - database design and optimization
 - performance tuning and reliability
 - secure software development practices
 - Experience with SQL and NoSQL databases
 - Familiarity with cloud infrastructure, CI/CD pipelines, and containerized environments
 - Strong communication and problem-solving skills
-

Preferred Experience

- Experience working in fintech, payments, SaaS, or infrastructure platforms
 - Familiarity with Stripe APIs or financial systems
 - Experience with AWS, Docker, Kubernetes, or Terraform
 - Experience with asynchronous systems, event-driven architecture, or message queues
 - Startup or high-growth engineering environment experience
 - Experience building automation systems, developer platforms, or data-intensive applications
-

Tech Environment

Backend

Python • FastAPI • Django • Flask • REST APIs

Infrastructure

AWS • Docker • Kubernetes • CI/CD

Database & Messaging

PostgreSQL • MySQL • MongoDB • Redis • Kafka

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation
 - ✦ High-impact engineering ownership
 - ✦ Collaborative and engineering-driven culture
 - ✦ Opportunity to work on innovative fintech and infrastructure platforms
 - ✦ Long-term growth and leadership opportunities
-

Apply

If you are passionate about backend engineering, scalable systems, and building modern financial technology platforms, we'd love to connect with you.
