About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the development of modern financial services, developer platforms, AI-driven products, and next-generation mobile applications used by businesses and consumers worldwide.

We are seeking an experienced **Senior iOS Engineer** to build high-quality, scalable, and secure iOS applications that deliver exceptional user experiences across Apple's ecosystem.

The Opportunity

As a Senior iOS Engineer, you will play a key role in designing, developing, and maintaining modern iOS applications while collaborating with cross-functional teams to deliver innovative digital products.

You'll work closely with Product Managers, UX/UI Designers, Backend Engineers, and QA teams to build intuitive, high-performance mobile experiences while contributing to architectural decisions and engineering best practices.

This role offers significant ownership, technical influence, and opportunities to mentor fellow engineers while shaping the future of our mobile platforms.

What You'll Do

iOS Application Development

- Design, develop, and maintain high-performance iOS applications using Swift and SwiftUI
- Build scalable, reusable, and maintainable mobile features and components
- Integrate applications with RESTful APIs, GraphQL services, and third-party SDKs
- Optimize application performance, responsiveness, and battery efficiency
- Ensure applications meet Apple's design, accessibility, and security standards

Architecture & Engineering Excellence

- Contribute to application architecture and technical decision-making
- Implement modern architectural patterns including MVVM and Clean Architecture
- Write clean, testable, and maintainable production-quality code
- Conduct code reviews and promote engineering best practices
- Identify and resolve complex performance, stability, and scalability challenges

Collaboration & Product Delivery

- Partner with Product Managers and Designers to deliver intuitive user experiences
- Work closely with Backend Engineers to build reliable API integrations
- Participate in sprint planning, technical estimation, and release planning
- Collaborate with QA teams to ensure high-quality application releases
- Support production deployments and ongoing application improvements

Mentorship & Innovation

- Mentor junior and mid-level engineers through technical guidance and code reviews
- Share knowledge across engineering teams and contribute to technical documentation
- Evaluate emerging iOS technologies and recommend improvements
- Drive continuous improvement across development processes and mobile engineering standards

What We're Looking For

Required Qualifications

Experience

- 5+ years of professional iOS development experience
- Proven experience building and maintaining production iOS applications
- Strong understanding of Apple's Human Interface Guidelines
- Experience working in Agile software development environments

Technical Expertise

Strong experience with:

- Swift
- SwiftUI
- UIKit
- Xcode
- Combine
- RESTful APIs
- GraphQL
- Git

Strong understanding of:

- MVVM and Clean Architecture
- iOS application lifecycle
- Concurrency (GCD, Async/Await)
- Dependency Injection
- Core Data and local persistence
- Mobile security best practices
- Performance optimization and memory management
- Unit testing and UI testing

Preferred Qualifications

- Experience working in fintech, payments, SaaS, e-commerce, or enterprise applications

- Experience integrating Firebase, analytics platforms, and push notifications
 - Familiarity with payment processing workflows and secure mobile authentication
 - Experience with Fastlane and CI/CD pipelines for iOS deployment
 - Experience developing applications for Apple Watch or other Apple ecosystem devices
 - Experience mentoring engineers and contributing to engineering strategy
-

Technology Environment

Mobile Development

Swift • SwiftUI • UIKit • Combine • Xcode

Architecture & Testing

MVVM • Clean Architecture • XCTest • XCUITest

Backend & Services

REST APIs • GraphQL • Firebase

Cloud & DevOps

AWS • Fastlane • GitHub Actions • CI/CD

Design & Collaboration

Figma • GitHub • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package
- ✨ Opportunity to build innovative mobile products with global impact
- ✨ Exposure to fintech, AI, and emerging technology initiatives
- ✨ Collaborative, engineering-first culture focused on innovation

- ✨ Career advancement into Staff Engineer, Mobile Architect, or Engineering Leadership
 - ✨ Strong investment in learning, mentorship, and continuous professional growth
-

Apply

If you are passionate about iOS development, creating exceptional mobile experiences, and building products that combine elegant design with robust engineering, we'd love to connect with you.
