

Staff Software Engineer (Rust)

High-Performance Systems, Distributed Architecture & Technical Excellence

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Staff Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of technology-driven businesses building secure, scalable, and high-performance software platforms. Our portfolio companies develop cloud-native applications, blockchain infrastructure, financial technologies, and enterprise software that power mission-critical systems around the world.

We are seeking an experienced **Staff Software Engineer (Rust)** to provide deep technical expertise, architect complex distributed systems, and drive engineering excellence across multiple teams and products.

The Opportunity

As a Staff Software Engineer (Rust), you will serve as a senior technical leader responsible for solving complex engineering challenges, defining architectural direction, and mentoring engineering teams. You'll collaborate closely with Engineering Managers, Product Managers, Architects, DevOps Engineers, and Executive Leadership to build scalable, secure, and high-performance software platforms.

This role is ideal for an experienced Rust engineer who enjoys hands-on development, architectural leadership, performance optimization, and influencing engineering strategy across an organization.

What You'll Do

Software Architecture & System Design

- Design and architect scalable backend platforms and distributed systems using Rust
- Define technical standards, architectural patterns, and engineering best practices
- Lead technical design reviews and provide guidance on complex engineering initiatives
- Evaluate emerging technologies and drive modernization across software platforms
- Ensure solutions are secure, maintainable, and built for long-term scalability

Rust Development

- Develop high-performance backend services, APIs, and microservices
- Build concurrent and asynchronous applications using modern Rust frameworks
- Optimize system performance, memory efficiency, and reliability
- Write clean, maintainable, and thoroughly tested production code
- Troubleshoot and resolve complex production issues

Technical Leadership

- Mentor Senior and Mid-Level Engineers through code reviews, architecture guidance, and technical coaching
- Lead engineering discussions and influence technical decisions across teams
- Promote software craftsmanship, engineering excellence, and continuous improvement
- Contribute to hiring, technical interviews, and engineering onboarding
- Share knowledge through technical documentation and internal presentations

Platform & Cloud Engineering

- Design cloud-native infrastructure supporting highly available applications
- Improve deployment automation through CI/CD pipelines and Infrastructure as Code
- Enhance observability using monitoring, logging, and distributed tracing
- Collaborate with DevOps and Security teams to ensure operational excellence
- Drive reliability, resilience, and performance improvements across production systems

Cross-Functional Collaboration

- Partner with Product Managers to translate business requirements into scalable technical solutions
 - Collaborate with Architects, QA, Security, and Platform Engineering teams
 - Participate in roadmap planning, technical estimation, and strategic engineering initiatives
 - Identify technical risks and implement proactive mitigation strategies
 - Foster a collaborative, engineering-first culture focused on innovation and ownership
-

What We're Looking For

Required Qualifications

Experience

- 8+ years of professional software engineering experience
- 5+ years of hands-on Rust development in production environments
- Proven experience architecting large-scale distributed systems and backend platforms
- Experience providing technical leadership across multiple engineering teams
- Strong experience working within Agile software development environments

Technical Expertise

Strong experience with:

- Rust
- Tokio
- Axum, Actix Web, or Rocket
- Cargo
- SQLx or Diesel
- PostgreSQL
- Redis

- REST APIs and gRPC
- Docker
- Kubernetes
- Git

Strong understanding of:

- Distributed systems architecture
 - Asynchronous programming
 - Concurrency and multithreading
 - Microservices architecture
 - Event-driven systems
 - Performance optimization
 - Secure software development
 - CI/CD pipelines and DevOps practices
-

Preferred Qualifications

- Experience building fintech, blockchain, AI, SaaS, or enterprise software platforms
 - Experience with Kafka, RabbitMQ, NATS, or Apache Pulsar
 - Familiarity with AWS, Azure, or Google Cloud Platform
 - Experience using Terraform or Pulumi for Infrastructure as Code
 - Knowledge of observability platforms including Prometheus, Grafana, OpenTelemetry, or Datadog
 - Contributions to open-source Rust projects or active participation in the Rust community
 - Experience mentoring engineers and influencing engineering strategy across large organizations
-

Technology Environment

Programming Languages

Rust • Go • Python • TypeScript

Rust Ecosystem

Tokio • Axum • Actix Web • Rocket • SQLx • Diesel • Serde • Tonic

Cloud & Infrastructure

AWS • Azure • Google Cloud Platform • Docker • Kubernetes • Terraform

Databases & Messaging

PostgreSQL • Redis • MongoDB • Kafka • RabbitMQ • NATS

DevOps & Observability

GitHub Actions • Jenkins • Prometheus • Grafana • OpenTelemetry • Datadog

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package
- ✨ Opportunity to architect high-performance software platforms using Rust and modern cloud technologies
- ✨ Exposure to blockchain, fintech, AI, and emerging technology initiatives
- ✨ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence
- ✨ Career advancement into Principal Engineer, Software Architect, Distinguished Engineer, Engineering Manager, or CTO
- ✨ Strong investment in continuous learning, technical leadership, open-source contributions, conference participation, and professional development

Apply

If you are passionate about building high-performance systems with Rust, solving complex engineering challenges, and driving technical excellence across modern software platforms, we'd love to connect with you.
