

Lead QA Engineer

Quality Engineering & Platform Excellence

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of modern financial services, payment technologies, developer platforms, and scalable software solutions used by businesses worldwide.

We are seeking an experienced **Lead QA Engineer** to drive quality initiatives, establish testing strategies, and lead QA efforts across mission-critical technology projects.

The Opportunity

As a Lead QA Engineer, you will be responsible for shaping quality engineering practices, leading testing initiatives, and ensuring the delivery of reliable, secure, and high-performing products.

You will collaborate closely with engineering, product, and DevOps teams to implement scalable quality processes, improve automation coverage, and champion a quality-first culture throughout the software development lifecycle.

This role combines hands-on testing expertise with leadership responsibilities and strategic influence across multiple teams.

What You'll Do

Quality Leadership

- Define and drive the overall QA strategy across products and engineering teams
- Establish quality standards, testing methodologies, and release criteria
- Lead and mentor QA engineers, fostering technical growth and collaboration
- Promote a shift-left testing culture and quality ownership throughout the development lifecycle
- Identify opportunities to improve testing efficiency and effectiveness

Test Automation & Execution

- Design, develop, and maintain automated test frameworks and test suites
- Oversee functional, regression, integration, API, and end-to-end testing efforts
- Validate new features and enhancements against business and technical requirements
- Ensure adequate test coverage across web, mobile, and backend systems
- Monitor test execution results and coordinate defect resolution activities

Process Improvement & Collaboration

- Partner with Product Managers, Software Engineers, and DevOps teams to ensure product quality
 - Participate in sprint planning, backlog refinement, and release readiness reviews
 - Develop QA metrics, dashboards, and reporting processes
 - Improve CI/CD pipelines through automated quality gates and testing integrations
 - Contribute to continuous improvement initiatives across engineering teams
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional experience in software quality assurance
- 2+ years of experience leading QA teams or major quality initiatives
- Proven experience building and scaling test automation frameworks
- Strong background in Agile software development environments

Technical Expertise

Strong experience with:

- Test automation frameworks and tools
- API testing methodologies
- Functional and regression testing
- End-to-end testing strategies
- Defect management processes
- CI/CD testing integrations
- Test planning and execution
- Risk-based testing approaches

Experience with one or more of the following technologies:

- Selenium
 - Playwright
 - Cypress
 - Postman
 - REST Assured
 - JUnit / TestNG
 - Appium
-

Preferred Qualifications

- Experience working in fintech, payments, SaaS, or highly regulated industries
- Familiarity with Stripe integrations and financial transaction workflows
- Experience testing cloud-native applications and microservices architectures

- Knowledge of performance testing tools such as JMeter or k6
 - Experience working with mobile application testing frameworks
 - Experience establishing QA processes within fast-growing organizations
-

Technology Environment

Test Automation

Selenium • Playwright • Cypress • Appium

API & Performance Testing

Postman • REST Assured • JMeter • k6

Development & Infrastructure

Java • JavaScript • TypeScript • Python

Cloud & DevOps

AWS • Docker • Kubernetes • CI/CD Pipelines

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package
- ✨ Opportunity to lead quality initiatives across impactful products
- ✨ Exposure to innovative fintech and emerging technology projects
- ✨ Collaborative and engineering-driven culture
- ✨ Career advancement into QA Management and Engineering Leadership paths
- ✨ Strong emphasis on quality, automation, and continuous improvement

Apply

If you are passionate about software quality, building scalable testing practices, and leading teams that deliver exceptional products, we'd love to connect with you.
