

Lead Web3 Full Stack Engineer

Full Stack Development, Blockchain Architecture & Web3 Technical Leadership

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Lead Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, fintech, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our portfolio companies build blockchain infrastructure, DeFi protocols, DAOs, tokenization platforms, NFT marketplaces, and Web3 applications that are transforming the future of finance and digital ownership.

We are seeking an experienced **Lead Web3 Full Stack Engineer** to lead the design, development, and delivery of scalable decentralized applications while driving technical excellence across frontend, backend, and blockchain engineering.

The Opportunity

As a Lead Web3 Full Stack Engineer, you will combine hands-on engineering with technical leadership to build secure, scalable, and high-performance Web3 platforms. You'll collaborate closely with Product Managers, Designers, Blockchain Engineers, DevOps Engineers, and Engineering Leadership to architect end-to-end solutions that integrate modern web technologies with blockchain infrastructure.

This role offers significant ownership over application architecture, engineering standards, and product delivery while providing opportunities to mentor engineers and shape the future of decentralized applications.

What You'll Do

Full Stack Development

- Design, develop, and maintain modern full stack Web3 applications from frontend to backend
- Build responsive, accessible, and high-performance user interfaces using modern JavaScript frameworks
- Develop secure backend APIs, microservices, and blockchain-integrated services
- Build reusable components, shared libraries, and scalable application architectures
- Write clean, maintainable, and production-ready code following engineering best practices

Blockchain & Web3 Development

- Integrate smart contracts with frontend and backend systems
- Build secure wallet authentication, transaction signing, and blockchain interaction workflows
- Develop decentralized applications (dApps) supporting DeFi, NFTs, DAOs, staking, governance, and tokenized assets
- Integrate blockchain infrastructure providers and indexing services
- Optimize blockchain transactions for performance, scalability, and user experience

Technical Leadership

- Lead architecture discussions and technical design reviews
- Define coding standards, engineering processes, and development best practices

- Mentor Full Stack and Blockchain Engineers through code reviews and technical coaching
- Evaluate emerging Web3 technologies and recommend strategic adoption
- Drive engineering excellence across multiple product teams

Cloud & Platform Engineering

- Design cloud-native distributed systems supporting blockchain applications
- Build CI/CD pipelines and deployment automation
- Improve observability through monitoring, logging, and distributed tracing
- Collaborate with DevOps teams to optimize infrastructure scalability and reliability
- Ensure platform security, resilience, and operational excellence

Cross-Functional Collaboration

- Partner with Product Managers to transform business requirements into scalable technical solutions
 - Collaborate with UX/UI Designers to deliver intuitive decentralized user experiences
 - Work closely with Smart Contract Engineers and Backend teams on blockchain integrations
 - Participate in sprint planning, technical estimation, and product roadmap discussions
 - Foster a collaborative engineering culture centered on innovation, ownership, and continuous improvement
-

What We're Looking For

Required Qualifications

Experience

- 7+ years of professional software engineering experience
- 3+ years of hands-on Web3 or blockchain development experience
- 2+ years of technical leadership or lead engineering experience
- Proven experience building production-grade full stack applications and decentralized platforms
- Experience working within Agile software development environments

Technical Expertise

Strong experience with:

Frontend

- TypeScript
- JavaScript (ES6+)
- React
- Next.js
- Tailwind CSS
- Redux, Zustand, or React Query

Backend

- Node.js (NestJS or Express)
- Go, Rust, or Python
- REST APIs and GraphQL
- PostgreSQL
- Redis
- Docker
- Git

Web3 Technologies

- Ethereum
- Solidity (integration experience)
- EVM-compatible blockchains
- ethers.js or viem
- WalletConnect
- Wagmi
- MetaMask
- Smart Contract Integration
- JSON-RPC

Strong understanding of:

- Full Stack Architecture
 - Microservices
 - Distributed Systems
 - API Security (OAuth2, JWT)
 - DeFi Protocols
 - DAO Governance
 - NFT Standards (ERC-721, ERC-1155)
 - Token Standards (ERC-20)
 - CI/CD and DevOps
 - Secure Software Development
-

Preferred Qualifications

- Experience building DeFi platforms, decentralized exchanges (DEXs), staking platforms, DAO governance tools, NFT marketplaces, or tokenization platforms
 - Familiarity with Layer 2 ecosystems including Arbitrum, Optimism, Base, Polygon, Avalanche, zkSync, or Solana
 - Experience with blockchain infrastructure providers such as Alchemy, Infura, QuickNode, Chainlink, or The Graph
 - Knowledge of Kubernetes, Terraform, Kafka, RabbitMQ, or event-driven architectures
 - Experience integrating AI-powered features into Web3 applications
 - Active contributions to open-source blockchain projects or the Web3 developer community
-

Technology Environment

Frontend

React • Next.js • TypeScript • JavaScript • Tailwind CSS • React Query • Zustand

Backend

Node.js • NestJS • Go • Rust • Python • GraphQL • REST APIs

Blockchain

Ethereum • Solidity • EVM • ethers.js • viem • Wagmi • WalletConnect • Hardhat • Foundry

Infrastructure & Cloud

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Databases & Messaging

PostgreSQL • Redis • MongoDB • Kafka • RabbitMQ

Blockchain Infrastructure

Alchemy • Infura • QuickNode • The Graph • Chainlink

Monitoring & DevOps

Prometheus • Grafana • OpenTelemetry • Datadog

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
- ✨ Full-time and part-time opportunities
- ✨ Competitive compensation package
- ✨ Opportunity to lead the development of next-generation Web3 platforms and decentralized applications
- ✨ Exposure to blockchain, DeFi, AI, fintech, and emerging technology initiatives
- ✨ Collaborative, engineering-first culture focused on innovation, ownership, and technical excellence
- ✨ Career advancement into Staff Engineer, Principal Engineer, Web3 Architect, Engineering Manager, Director of Engineering, or CTO
- ✨ Strong investment in leadership development, blockchain research, continuous learning, open-source contributions, and industry conferences

Apply

If you are passionate about building end-to-end Web3 applications, leading engineering teams, and creating secure, scalable decentralized platforms that shape the future of the internet, we'd love to connect with you.
