

Senior Backend Engineer (Blockchain, DeFi & DAO)

Web3 Infrastructure, Decentralized Finance & Distributed Systems

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, blockchain, digital infrastructure, commerce, and emerging technology sectors.

Through strategic investments and partnerships, we help advance the development of decentralized technologies, digital asset ecosystems, and next-generation financial platforms. Our teams work alongside innovative companies building the future of blockchain infrastructure, decentralized finance (DeFi), and digital governance.

We are seeking an experienced **Senior Backend Engineer** with expertise in **Blockchain, DeFi, and DAO ecosystems** to build secure, scalable backend services that power decentralized applications and Web3 platforms.

The Opportunity

As a Senior Backend Engineer, you will design and develop backend systems that integrate with blockchain networks, smart contracts, decentralized finance protocols, and DAO governance platforms.

Working alongside blockchain engineers, frontend developers, product managers, and infrastructure teams, you will build high-performance APIs, blockchain indexing services, transaction processing systems, and cloud-native infrastructure supporting next-generation Web3 products.

This is a highly technical role offering significant ownership, architectural influence, and opportunities to contribute to cutting-edge decentralized technologies.

What You'll Do

Backend & Platform Engineering

- Design, develop, and maintain scalable backend services supporting blockchain applications
- Build secure RESTful APIs, GraphQL services, and event-driven microservices
- Develop blockchain indexing services and transaction processing systems
- Design backend architectures capable of handling high-volume decentralized workloads
- Optimize application performance, scalability, and reliability

Blockchain & Web3 Development

- Integrate backend systems with Ethereum, Layer 2 networks, and EVM-compatible blockchains
- Develop services supporting wallet authentication, token management, staking, and governance
- Build infrastructure for interacting with smart contracts and on-chain data
- Support blockchain event processing, indexing, and synchronization
- Collaborate with smart contract engineers to ensure seamless protocol integration

DeFi & DAO Infrastructure

- Build backend services supporting DeFi applications such as lending, staking, liquidity, and asset management
- Develop systems for DAO governance, proposal management, voting mechanisms, and treasury operations
- Implement secure transaction workflows and digital asset management solutions

- Monitor blockchain activity and optimize backend services for decentralized environments
- Support multi-chain integrations and cross-chain interoperability initiatives

Engineering Excellence

- Write clean, maintainable, and well-tested production code
 - Participate in architecture reviews, technical planning, and code reviews
 - Improve system observability, monitoring, and operational reliability
 - Mentor junior engineers and contribute to engineering best practices
 - Drive continuous improvements in security, scalability, and software quality
-

What We're Looking For

Required Qualifications

Experience

- 5+ years of professional backend software engineering experience
- 2+ years of experience developing blockchain or Web3 applications
- Proven experience building scalable backend systems in production environments
- Experience working in Agile software development teams

Technical Expertise

Strong experience with:

- Node.js, Go, Rust, Java, or Python
- REST APIs and GraphQL
- Microservices architecture
- PostgreSQL, MongoDB, or Redis
- Event-driven architectures
- Docker and Kubernetes
- Cloud platforms (AWS, Azure, or GCP)

Strong understanding of:

- Ethereum and EVM-compatible blockchains
- Smart contract interaction using ethers.js or web3 libraries
- Blockchain transaction lifecycle
- Wallet authentication (MetaMask, WalletConnect)
- Distributed systems architecture

- Security best practices for blockchain applications
 - Performance optimization and scalability
-

Preferred Qualifications

- Experience building DeFi protocols, decentralized exchanges (DEXs), staking platforms, or yield farming applications
 - Experience with DAO governance frameworks such as Snapshot, Aragon, Tally, or OpenZeppelin Governor
 - Familiarity with Solidity smart contracts and Ethereum development tools
 - Experience integrating Layer 2 solutions including Arbitrum, Optimism, Base, or Polygon
 - Knowledge of blockchain indexing technologies such as The Graph, Subsquid, or custom indexers
 - Experience with Web3 infrastructure providers including Alchemy, Infura, QuickNode, or Chainlink
 - Contributions to open-source blockchain or decentralized finance projects
-

Technology Environment

Backend Development

Node.js • Go • Rust • Java • Python • NestJS

Blockchain & Web3

Ethereum • Solidity • Ethers.js • Web3.js • Hardhat • Foundry

DeFi & DAO

Uniswap • Aave • Compound • Snapshot • OpenZeppelin • Safe (Gnosis Safe)

Cloud & Infrastructure

AWS • Docker • Kubernetes • Terraform • GitHub Actions

Data & Messaging

PostgreSQL • Redis • MongoDB • Kafka • RabbitMQ

Tools & Collaboration

GitHub • Jira • Slack • Notion

Why Join Us

- ✨ Flexible remote, hybrid, and onsite work options
 - ✨ Full-time and part-time opportunities
 - ✨ Competitive compensation package
 - ✨ Opportunity to build next-generation blockchain and decentralized finance infrastructure
 - ✨ Exposure to innovative Web3, DeFi, DAO, and digital asset initiatives
 - ✨ Collaborative, engineering-first culture focused on innovation
 - ✨ Career advancement and technical leadership opportunities
 - ✨ Strong investment in continuous learning, open-source contributions, and emerging technologies
-

Apply

If you are passionate about backend engineering, decentralized technologies, and building secure, scalable infrastructure for Blockchain, DeFi, and DAO ecosystems, we'd love to connect with you.
