

Senior Web3 Game Developer

Blockchain Gaming, Smart Contracts & Multiplayer Game Development

-  Remote / Hybrid / Onsite
 -  Full-Time or Part-Time
 -  The Copia Group, LLC
 -  Senior Level
-

About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across blockchain, gaming, AI, digital infrastructure, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of studios and technology companies building the next generation of Web3 games, virtual economies, metaverse experiences, and decentralized gaming platforms. Our portfolio companies combine blockchain technology with immersive gameplay to create secure, player-owned digital ecosystems.

We are seeking an experienced **Senior Web3 Game Developer** to build scalable blockchain-powered games and interactive experiences that blend exceptional gameplay with decentralized technologies.

The Opportunity

As a Senior Web3 Game Developer, you will design and develop high-performance multiplayer games while integrating blockchain technologies such as NFTs, digital assets, wallets, and smart contracts. You'll collaborate closely with Game Designers, Artists, Blockchain Engineers, Backend Developers, Product Managers, and DevOps teams to deliver engaging gaming experiences powered by Web3.

This role offers significant ownership over gameplay systems, blockchain integration, technical architecture, and live game infrastructure while providing opportunities to mentor engineers and influence the future of decentralized gaming.

What You'll Do

Game Development

- Design, develop, and maintain high-quality multiplayer and online game systems
- Build gameplay mechanics, progression systems, inventories, and player interactions
- Optimize game performance across desktop, mobile, and web platforms
- Develop reusable game frameworks and tools that improve development efficiency
- Write clean, maintainable, and production-ready code

Web3 & Blockchain Integration

- Integrate wallets, NFTs, digital assets, and blockchain transactions into gameplay
- Build secure interactions with smart contracts and decentralized applications (dApps)
- Develop systems supporting player-owned economies, marketplaces, and token rewards
- Implement blockchain transaction monitoring and backend integrations
- Optimize blockchain interactions for scalability, cost, and user experience

Backend & Online Services

- Develop backend services supporting multiplayer gameplay and player progression
- Build matchmaking, authentication, inventory, leaderboard, and reward systems
- Design secure APIs and cloud services supporting live game operations
- Implement analytics, telemetry, and live operations tooling
- Ensure platform scalability, reliability, and operational excellence

Technical Leadership

- Collaborate with Game Designers to transform creative ideas into engaging gameplay
 - Mentor engineers through code reviews and technical guidance
 - Participate in architecture reviews, sprint planning, and technical roadmap discussions
 - Promote engineering best practices across game development and blockchain integration
 - Stay current with emerging Web3 gaming technologies and industry trends
-

What We're Looking For

Required Qualifications

Experience

- 5+ years of professional game development experience
- 2+ years of Web3, blockchain, or NFT gaming development experience
- Proven experience developing multiplayer or online games
- Experience shipping games on desktop, mobile, or web platforms
- Experience working in Agile software development environments

Technical Expertise

Strong experience with:

- Unity (C#) or Unreal Engine (C++)
- TypeScript or JavaScript
- REST APIs
- Git
- Docker
- PostgreSQL or MongoDB

Strong experience with Web3 technologies:

- Ethereum
- Solidity (integration experience)
- EVM-compatible networks
- Wallet integrations
- ethers.js or viem
- NFTs (ERC-721, ERC-1155)
- ERC-20 token integrations
- Smart contract interactions

Strong understanding of:

- Multiplayer networking
 - Client-server architecture
 - Game optimization techniques
 - Digital asset ownership
 - Blockchain security best practices
 - Distributed systems
 - Cloud-native deployment
 - Live game operations
-

Preferred Qualifications

- Experience building Web3 games, metaverse platforms, MMORPGs, strategy games, or play-to-earn ecosystems
 - Experience integrating Layer 2 networks such as Polygon, Arbitrum, Immutable, Ronin, Avalanche, or Base
 - Familiarity with Unity Gaming Services, Photon, Mirror, PlayFab, or Nakama
 - Experience building NFT marketplaces, in-game economies, DAO governance, or staking systems
 - Knowledge of AWS, Kubernetes, Terraform, and scalable backend infrastructure
 - Contributions to blockchain gaming projects or open-source Web3 initiatives
-

Technology Environment

Game Development

Unity • Unreal Engine • C# • C++ • TypeScript • JavaScript

Blockchain Technologies

Ethereum • Solidity • EVM • NFTs • ERC-20 • ERC-721 • ERC-1155 • Smart Contracts

Web3 Development

ethers.js • viem • WalletConnect • MetaMask • Hardhat • Foundry • The Graph

Backend & Cloud

Node.js • Go • Python • PostgreSQL • Redis • AWS • Docker • Kubernetes

Game Services

Photon • PlayFab • Nakama • Unity Gaming Services • Firebase

DevOps & Monitoring

GitHub Actions • Prometheus • Grafana • OpenTelemetry

Tools & Collaboration

GitHub • Jira • Slack • Notion • Figma

Why Join Us

- ✦ Flexible remote, hybrid, and onsite work options
 - ✦ Full-time and part-time opportunities
 - ✦ Competitive compensation package
 - ✦ Opportunity to build next-generation Web3 games and decentralized gaming ecosystems
 - ✦ Exposure to blockchain, AI, metaverse, digital asset, and emerging gaming technologies
 - ✦ Collaborative, engineering-first culture focused on creativity, innovation, and technical excellence
 - ✦ Career advancement into Lead Game Engineer, Technical Director, Blockchain Architect, Engineering Manager, or CTO
 - ✦ Strong investment in professional development, game innovation, blockchain research, conference participation, and open-source contributions
-

Apply

If you are passionate about creating immersive gaming experiences, building blockchain-powered virtual economies, and shaping the future of Web3 gaming, we'd love to connect with you.
