About The Copia Group

The Copia Group is an investment management firm supporting innovative companies across fintech, digital infrastructure, commerce, AI, and emerging technology sectors.

Through strategic investments and partnerships, we help accelerate the growth of innovative businesses by supporting the development of scalable software platforms, financial technologies, and enterprise solutions. Our portfolio companies rely on exceptional customer experiences, reliable technical operations, and world-class support organizations.

We are seeking an experienced **Technical Support Manager** to lead our technical support function, build high-performing customer support teams, and ensure exceptional service delivery across our technology portfolio.

The Opportunity

As a Technical Support Manager, you will lead a team of Technical Support Engineers responsible for delivering outstanding customer experiences and resolving complex technical issues. You will oversee support operations, improve processes, establish service standards, and collaborate with Engineering, Product, and Customer Success teams to enhance product quality and customer satisfaction.

This role combines technical expertise, operational leadership, and people management, making it ideal for someone passionate about building efficient support organizations and helping customers succeed.

What You'll Do

Support Leadership

- Lead, mentor, and develop a team of Technical Support Engineers
- Establish performance goals, coaching plans, and career development opportunities
- Foster a customer-first culture focused on responsiveness, quality, and continuous improvement
- Manage hiring, onboarding, and team development initiatives
- Drive operational excellence across global support functions

Technical Support Operations

- Oversee the resolution of complex customer issues and technical escalations
- Monitor support queues and ensure adherence to SLAs and KPIs
- Develop and optimize support workflows, escalation procedures, and operational processes
- Analyze support trends and implement improvements that enhance customer satisfaction
- Coordinate major incident management and post-incident reviews

Cross-Functional Collaboration

- Partner with Engineering teams to resolve product defects and technical issues
- Collaborate with Product Managers to communicate customer feedback and feature requests
- Work closely with Customer Success and Sales teams to improve the customer experience

- Ensure effective communication during product releases and platform updates
- Advocate for customer needs across the organization

Knowledge Management & Continuous Improvement

- Build and maintain internal documentation, knowledge bases, and troubleshooting guides
 - Identify recurring issues and drive long-term solutions through automation and process improvements
 - Implement support metrics, dashboards, and reporting for leadership
 - Evaluate and introduce new support tools and technologies
 - Promote best practices in customer service and technical troubleshooting
-

What We're Looking For

Required Qualifications

Experience

- 6+ years of experience in Technical Support, Customer Support, or IT Operations
- 2+ years of experience managing or leading technical support teams
- Proven experience supporting SaaS, cloud-based, or enterprise software products
- Experience working in Agile and fast-paced technology environments

Technical Expertise

Strong experience with:

- Technical troubleshooting and root cause analysis
- Customer support operations
- Incident and escalation management
- CRM and ticketing systems
- Knowledge management platforms
- Performance reporting and operational metrics
- Cross-functional collaboration
- Team leadership and coaching

Strong understanding of:

- Cloud-based applications and SaaS platforms
- APIs and web technologies
- Networking fundamentals

- Software development lifecycle
 - Customer experience best practices
 - ITIL principles and service management
 - Operational process improvement
-

Preferred Qualifications

- Experience supporting fintech, payments, blockchain, SaaS, or enterprise software platforms
 - Familiarity with Stripe, cloud infrastructure, or API-based products
 - Experience with Zendesk, Jira Service Management, Freshdesk, Salesforce, or Intercom
 - Experience leading globally distributed support teams
 - ITIL Foundation, AWS, Azure, or customer support certifications are a plus
 - Passion for mentoring support professionals and building customer-centric organizations
-
